Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the visitor and information portal of the Russian Ethnographic Museum in Saint Petersburg, presenting exhibitions, collections, research and educational resources, accessibility services, institutional information, and booking facilities for admission tickets and excursions.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or adverse threat-reputation signals were observed. The homepage maintains a coherent museum identity across its visitor, collections, research, staff, history, document, and contact areas. Interactive forms are consistent with ordinary museum operations, and testing found no hidden forms, credential-capture interface, untrusted form destination, cloaking, clipboard manipulation, or cryptocurrency-wallet activity.

- The homepage identifies the institution as the Russian Ethnographic Museum and provides internally consistent navigation covering its history, departments and staff, collections, exhibitions, scholarly resources, and visitor services.
- The domain was registered in 1999 and is approximately 27.36 years old; registration is maintained through RU-CENTER-RU until 2027-04-30.
- External threat screening recorded 0 malicious and 0 suspicious detections, no safe-browsing alert, no external threat-list hit, and no abuse reports.
- Homepage behavior testing found no login form, hidden forms, external password submission, suspicious inline scripts, brand impersonation, or cloaking.

Regulatory Verification Notes

The site presents a public cultural institution rather than a broker, investment service, or other regulated financial undertaking. Its homepage exposes institutional sections for documents, governance-related bodies, staff, contacts, privacy information, and accessibility. No licensing claim is made, and the supplied evidence does not establish a need for a sector-specific financial authorization. The absence of a broker-intelligence match therefore has no adverse regulatory significance for the museum's stated activities.

- The homepage categorizes the service as a museum and visitor portal supporting admissions, excursions, educational programs, events, collections, and research access.
- Institutional navigation includes Documents, Departments and Staff, Academic Council, Museum History, Press Office, Contacts, and privacy information.

- The hosting infrastructure is served from AS44112 by SWEB-AS – SpaceWeb Ltd, RU.
- The site uses a valid domain-validated TLS certificate issued by R12, valid to 2026-08-25.

What to Verify Next

Routine institutional due diligence may confirm that ticket-payment recipients and excursion confirmations use the museum’s stated identity, particularly for group or organizational purchases. Organizations submitting personal information through newsletter, excursion, or accessibility forms may also review the applicable privacy notice and retention terms. Official contact channels can be confirmed independently when arranging bespoke events, image licensing, or collection-related services.

- The homepage provides ticket purchasing, pricing, excursion-ordering, and visitor-rule pathways that can be checked against transaction documentation.
- Three operational forms were identified for newsletter subscription, excursion requests, and accessibility-assistance requests; none submitted data to an untrusted destination.
- The site publishes dedicated contact, privacy, accessibility, and institutional-document pathways relevant to those checks.

Summary Verdict

The website is a legitimate, established, and trustworthy institutional portal. Its longstanding identity, coherent public-museum content, clean external reputation, stable behavior, and ordinary service model converge strongly in support of normal use, including ticketing, form submission, and any standard account interaction offered by the service.

Infrastructure Integrity

The site resolves to one directly exposed likely-origin address in Russia, with no CDN or WAF identified. This straightforward hosting arrangement provides valid encrypted transport and a stable, attributable network presence, although it does not add the traffic-filtering or origin-shielding benefits of an edge protection service; infrastructure protection is therefore a supporting operational signal rather than independent proof of legitimacy.

Closing Assessment

Prospective visitors and institutional counterparties may interact with the website normally, applying standard transaction and privacy checks appropriate to online museum services.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ethnomuseum.ru.

- The request stayed on ethnomuseum.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 4 name servers. NOTED
- The registration is paid up to 2027-04-30. NOTED
- It is hosted on SWEB-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ethnomuseum.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
