

Is ethyca.com legit? TrustSniffer's high-trust assessment: 100/100

ethyca.com

Verdict

100

OUT OF 100

HIGH TRUST

ethyca.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 65%.

What this site appears to be

Ethyca presents an enterprise data privacy and trusted-data infrastructure platform covering governance taxonomy, data inventory, consent orchestration, automated data subject requests, de-identification, and AI policy enforcement. It includes customer references, testimonials, documentation, open-source resources, contact forms, and privacy controls.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Ethyca is an enterprise privacy and trusted-data infrastructure platform that presents governance, consent management, data inventory, automated data-subject requests, de-identification, and AI policy-enforcement software for organizational customers.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent enterprise SaaS model, with customer references, testimonials, documentation, open-source resources, privacy controls, and no phishing, impersonation, deceptive financial, cryptocurrency, or wallet-draining indicators. Its stated products and business model are internally consistent with a legitimate privacy-software provider.

- The homepage describes enterprise privacy, consent-management, data-governance, sensitive-data inventory, automated data-subject requests, de-identification, AI policy enforcement, and the open-source Fides platform.
- The site showed no login form, hidden forms, cloaking, suspicious scripts, or wallet-drainer activity.
- The domain has 513 archive snapshots spanning 2003-03-29 to 2026-07-13, covering 24 tracked years.
- WHOIS records creation on 2012-10-21 and an age of 13.79 years; the archive-reconciled domain age is 23.342915811088297 years.

Regulatory Verification Notes

Ethyca presents a software and data-governance business rather than a financial service requiring a trading or investment license. The available pages do not make a specific regulatory-license claim, so applicable corporate, privacy, and procurement disclosures should be confirmed during enterprise onboarding. Privacy-protected registration details are an administrative characteristic, not an identity contradiction.

- Registration is through NameSector LLC, with expiry recorded as 2027-10-21; the registrant organization is NameBrightPrivacy.com.
- The site is served from AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- The TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-10-05.
- No matching broker-reputation record was identified.

What to Verify Next

For formal procurement, confirm the operating legal entity, applicable privacy commitments, data-processing terms, and any sector-specific attestations through the site's legal materials and independent corporate records. Sales and support channels should also be validated through an independently sourced company contact.

- The site provides a Privacy Policy and consent-management controls.
- The homepage provides contact and newsletter workflows suitable for confirming commercial and data-capture details.

Summary Verdict

Ethyca presents as a legitimate, established, high-trust enterprise software provider with a coherent identity and no observed scam or impersonation indicators. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The available runtime evidence showed stable behavior without cloaking, hidden sensitive forms, or wallet-drainer activity. Hosting and protective infrastructure are mitigating signals only and do not independently establish legitimacy.

Closing Assessment

Prospective users may proceed with normal interaction and standard account actions, subject to ordinary enterprise procurement and privacy review.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ethyca.com.

- The request stayed on ethyca.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSector LLC. CLEAR
- DNS for this domain is served by awsdns-02.org, across 4 name servers. NOTED
- The registration is paid up to 2027-10-21. CLEAR
- The earliest public archive of this site is from 2003-03-29. CLEAR

- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ethyca.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
