

Is etisalat-amazonprime.com a scam? TrustSniffer's high-risk assessment: 0/100

etisalat-amazonprime.com

Verdict

0

OUT OF 100

CRITICAL RISK

etisalat-amazonprime.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Landing page claiming an Etisalat-Amazon Prime promotion that asks for a mobile number and OTP to activate a free trial / paid membership. The flow requests verification codes and indicates charging through the mobile account. Minimal verifiable legal/contact information; appears structured to enroll or bill users with unclear evidence of legitimacy.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What etisalat-amazonprime.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a promotional landing page presenting an Etisalat–Amazon Prime offer in the UAE, advertising a free trial and subscription benefits while directing visitors to provide a mobile number and one-time verification code to activate or charge a membership through a mobile account.

Scam/Impersonation Risk

Contradictions were observed. The site is externally blacklisted, with malicious detections reported by multiple security providers, and the page implements a sensitive enrollment flow around a purported Etisalat–Amazon Prime promotion. It requests a mobile number, sends a four-digit OTP, states that the subscription will renew automatically, and displays insufficient-balance and charging messages. The combination of a sensitive form, an untrusted submission destination, unclear payment flow, and the confirmed blacklist materially supports a high-

risk assessment. The available evidence does not establish a distinct brand-impersonation finding or conflicting legal identities, but the promotion itself is not independently validated by the page. Evidence:

- The landing page claims an Etisalat–Amazon Prime promotion and requests a mobile number followed by a four-digit OTP for activation.
- The same page states that the subscription will automatically renew and may be charged through the mobile account.
- External security checks recorded 15 malicious detections and confirmed blacklist status from two sources.
- Registration records show creation on 2020-10-07T18:21:15Z and an age of 5.87 years.

Regulatory Verification Notes

The page provides minimal verifiable legal or contact information and does not state a licensing authority or registration number. That is a material disclosure gap for a service that can create recurring charges, although the absence of a stated license is a verification issue rather than, by itself, proof of fraud. Independent identity verification remains unavailable in the supplied evidence. The domain uses a multi-year registration through Ascio Technologies, Inc., while the technical certificate and hosting arrangements establish transport and infrastructure facts but do not validate the operator or the commercial offer. Evidence:

- The promotional page contains no visible licensing authority or registration number and only limited legal or contact information.
- WHOIS identifies Ascio Technologies, Inc. as registrar; expiration is 2026-10-07T18:21:15Z.
- The site is served from AS8075, MICROSOFT-CORP-MSN-AS-BLOCK - Microsoft Corporation, US.
- The TLS certificate is issued by GeoTrust TLS RSA CA G1, uses DV validation, and is valid to 2026-12-19T23:59:59+00:00.

What to Verify Next

The promotion should be confirmed through an independently accessed official Etisalat or Amazon customer-service channel before any interaction. The prospective user should not submit a mobile number or OTP, authorize recurring mobile billing, or provide payment details unless the offer, destination, pricing, renewal terms, cancellation process, and responsible legal entity are confirmed through that independent channel. Any claimed service terms, privacy notice, refund process, and customer-support route should be checked for consistency with the independently confirmed operator. Evidence:

- The page's single form includes phone-number entry, OTP verification, and a subscription activation action.
- Browser observation recorded requests for phone and OTP data, charging through the mobile account, and redirection after submission.
- The page displays automatic-renewal and insufficient-balance messages without clearly identifying the responsible service operator.

Summary Verdict

The website has a **critical trust posture** and should be treated as unsuitable for sensitive interaction. The combination of confirmed external threat detections and a payment-linked verification workflow creates substantial risk to account, billing, and personal information.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and is a mitigating control against direct exposure of the underlying service, but it is not evidence that the site or promotion is legitimate. Observed edge infrastructure is associated with Microsoft Corporation in the United States, and the origin server was not observable in this analysis.

Evidence:

- Cloudflare CDN/WAF protection was detected; one edge IP was observed and no likely origin candidate was identified.
- The observed edge address is 23.97.224.11 on AS8075.

Closing Assessment

The appropriate enterprise posture is to block or isolate the site from sensitive workflows and escalate the promotion for independent brand-owner review; any already-submitted mobile or billing information should be reported promptly through the relevant telecommunications provider's official support channel.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by governance, analysis engine, behaviour in a sandbox, page content.

01 Governance Risk • A form asking for sensitive information submits somewhere TrustSniffer could not verify, which caps how far the score can rise. Governance rule:GOV_SENSITIVE_FORM_UNTRUSTED	
02 Sensitive Interaction Risk • The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor. Analysis engine signal:direct_threat • The page made background requests to destinations TrustSniffer does not recognise. Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR • The page carried inline scripts written in a style TrustSniffer treats as suspicious. Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS • The page exchanged network traffic with destinations TrustSniffer does not recognise. Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC • Most of what the page loaded came from other domains rather than from this one. Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH • The page sent data to a destination TrustSniffer does not recognise. Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS • The page asks visitors for sensitive information. Page content rule:PAGE_FORM_SENSITIVE • A form on the page submits to a destination TrustSniffer could not verify. Page content rule:PAGE_FORM_UNTRUSTED_DEST	

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of etisalat-amazonprime.com.

- The request stayed on etisalat-amazonprime.com. It was not redirected to another domain. CLEAR
- Registration is published under Ascio Technologies, Inc. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-07. NOTED
- The earliest public archive of this site is from 2021-12-03. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about etisalat-amazonprime.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals

were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
