

Is eurointegration.com.ua legit? TrustSniffer's high-trust assessment: 90/100

eurointegration.com.ua

Verdict

90

OUT OF 100

HIGH TRUST

eurointegration.com.ua appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 75%.

What this site appears to be

Article index and news portal content from 'Європейська правда' covering Ukraine, EU accession, politics and Europe; contains editorial articles, timestamps, author bylines, contact email, address and notes about promoted content and donors.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is “Європейська правда,” an established Ukrainian news and analysis portal focused on Ukraine's European integration, EU and NATO developments, politics, security, defence, and current affairs. It presents article indexes, news reports, analysis, interviews, columns, author bylines, and publication timestamps for an informational media audience.

Scam/Impersonation Risk

No contradictions were observed. The site's substantial editorial content, consistent news-portal structure, author attribution, timestamps, and absence of login, payment, wallet-connect, or hidden sensitive forms are consistent with an informational media service rather than an abuse-oriented site. Automated interaction testing recorded external network activity, DOM changes, and console errors, but the corrected behavioural interpretation found no cloaking, credential harvesting, wallet-draining activity, or other high-risk abuse pattern; these observations are therefore treated as implementation or advertising-related behaviour rather than evidence of impersonation. Independent reputation checks found no malicious or suspicious detections, and no brand-impersonation signal was identified.

EVIDENCE

- The article index contains editorial sections, author bylines, timestamps, archive and search functions, and current-affairs coverage; the page contains one consent-banner form and no sensitive form.
- Two successful interaction runs recorded 29 external XHR requests, 24 external posts, 8 console errors, and a maximum post-interaction DOM difference of 2,233; cloaking, hidden forms, password-external forms, wallet-provider activity, clipboard hijacking, and wallet-drainer activity were all absent.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no phishing or blacklist hit; the site ranked 25,627 in the recorded global traffic ranking.
- Domain history shows 5,000 archive snapshots from 2014-06-05 through 2022-01-25, covering 9 tracked years with a maximum gap of 1 year and no suspicious repurposing.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate media publisher, although the real-world operator identity is not independently verified. The site's editorial and contact presentation includes copyright statements, an address, contact information, and notices concerning advertising, promoted content, sponsored projects, and donor support. It does not present a financial-services license or licensing number in

the observed content; for this editorial business model, that is a disclosure and applicability point rather than evidence of a scam. Registration records associate the domain with the listed registrar and registrant, but those records alone do not prove the operator's real-world identity.

EVIDENCE

- The domain was registered on 2014-04-22 and is approximately 12.31 years old; the recorded expiration date is 2027-04-22.
- Registration records list registrar ТОВ "Інтернет Інвест" and registrant ТОВ "УП МЕДІА ПЛЮС".
- The site is served through AS396982, Google-Cloud-Platform / Google LLC, US.
- Transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV E36, valid through 2026-09-12T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the publisher's legal identity and, where a paid service, sponsorship, donation, or commercial arrangement is contemplated, reconcile the relevant terms, refund conditions, and payment-protection arrangements with the counterparty. Official contact channels should also be confirmed through an independently sourced route rather than relying solely on information presented on the site.

EVIDENCE

- The site identifies advertising, promoted content or sponsored projects, and donor support as parts of its operating model; each proposed commercial or donation arrangement should therefore be matched to documented terms.
- The site provides editorial contact details and an address in its content presentation; those details can be compared with an independently sourced publisher record.
- The site's observed interaction surface is limited to a consent banner, with no sensitive form detected during testing.

Summary Verdict

The overall posture is high trust and low risk, with strong convergence among the site's mature editorial presentation, sustained domain and archive history, clean external reputation, and sound transport and hosting signals. The evidence supports normal informational use and is consistent with an established website, while not independently proving the real-world operator's identity.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. The observed address was a CDN edge address associated with Google Cloud, and no origin server address was exposed in the analysis; this reduces direct origin exposure and is a mitigating infrastructure signal, not proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; credential or payment activity should proceed only after the standard independent identity, transaction-term, and payment-protection checks have been completed.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of eurointegration.com.ua.

- The request stayed on eurointegration.com.ua. It was not redirected to another domain. CLEAR
- Registration is published under TOB "Інтернет Інвест". CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-22. NOTED
- The earliest public archive of this site is from 2014-06-05. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eurointegration.com.ua at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
