

Is euronews.com legit? TrustSniffer's high-trust assessment: 90/100

euronews.com

Verdict

90

OUT OF 100

HIGH TRUST

euronews.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Editorial news page from Euronews with multiple topical sections (Europe, World, Climate, Tech, Culture). Page includes cookie consent and advertising placeholders; primary purpose is news delivery.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Euronews is an editorial news and media website presenting breaking video and written reporting across Europe, world affairs, climate, technology, health, culture, and travel; its apparent business model is ad-supported publishing with potential subscriptions, newsletters, events, and partner content.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent editorial-news purpose, with no detected impersonation, phishing, malicious reputation, sensitive form, or wallet-interaction indicators. The site's long registration continuity and substantial historical presence are consistent with an established web property rather than a recently created or repurposed site. The independent operator identity remains unverified, so the evidence supports an apparently legitimate and established website rather than proving the real-world entity behind it.

EVIDENCE

- Domain registration record: registered 1997, approximately 29.32 years old.
- Web archive: 5,000 snapshots spanning 2004–2016, covering 13 tracked years.
- Homepage: editorial news content was present, with no login form, sensitive form, or detected brand-impersonation indicator.

Regulatory Verification Notes

The available content describes a news publisher rather than a regulated financial service. No licensing claim or license number is presented in the reviewed material; this is not inherently adverse for an editorial publisher, but any subscription, event, or other paid offering should be supported by clearly identified contracting terms. The available evidence is consistent with an established site, while independently connecting it to a specific real-world operator remains unresolved. No broker-related third-party match was recorded.

EVIDENCE

- Domain registration record: registrar listed as Hogan Lovells International LLP.
- Application delivery telemetry: served from AS54113, FASTLY - Fastly, Inc., US.
- Transport encryption: TLS certificate issued by GlobalSign GCC R46 DV TLS CA 2025, validation level DV, valid to 2027-02-11.
- Homepage: cookie-consent text identifies advertising, analytics, marketing, personalization, and audience-measurement processing involving 414 partners.

What to Verify Next

Before credential or payment interactions associated with subscriptions or other paid services, independently confirm the publisher's legal entity, subscription terms, cancellation and refund provisions, and available payment protections. Review the site's privacy and cookie controls to ensure the intended consent settings are applied. Official support or contact channels should be confirmed through an independently sourced route rather than relying solely on information encountered during a single browsing session.

EVIDENCE

- Homepage: cookie-consent controls and privacy-processing disclosures are presented to visitors.
- Homepage: the reviewed page is informational and contains no sensitive submission form.
- Business-model presentation: advertising and possible subscription or partner-content revenue are indicated, making payment and cancellation terms the relevant points for independent review.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary browsing and news consumption. The conclusion is strong at the website-risk level, but it does not independently prove the real-world operator's identity.

Infrastructure Integrity

The site is delivered through Amazon CDN/WAF infrastructure, with observed addresses belonging to AWS edge servers and no origin candidate identified in the resolution data. This provides a meaningful exposure-mitigation layer but is not, by itself, proof of legitimacy. A separate report signal associated with a shared Fastly CDN address was discounted because it was attributed to shared provider infrastructure, was whitelisted, and carried zero confidence for site-level abuse.

Closing Assessment

Ordinary browsing is reasonable; before submitting credentials or making payments, the prospective user should complete the independent identity, terms, cancellation, and payment-protection checks described above.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 26 reports on hosting IP 199.232.173.91 (Fastly, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of euronews.com.

- The request stayed on euronews.com. It was not redirected to another domain. CLEAR
- Registration is published under Hogan Lovells International LLP. CLEAR
- DNS for this domain is served by awsdns-06.org, across 4 name servers. NOTED
- The registration is paid up to 2027-04-25. NOTED
- The earliest public archive of this site is from 2004-01-24. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about euronews.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
