

Is europepolls.com legit? TrustSniffer's high-trust assessment: 80/100

europepolls.com

Verdict

80

OUT OF 100

HIGH TRUST

europepolls.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

A small Google Sites-hosted informational website for Europe-focused polls and surveys, providing contact details and site navigation. No login, payment, or investment features detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

EuropePolls.com is a small informational website presenting Europe-focused public-opinion polls, survey findings, news, and participation information. Its apparent business model is public research and polling rather than e-commerce, financial services, or account-based activity.

Scam/Impersonation Risk

No contradictions were observed across the homepage, navigation, contact materials, reputation indicators, and behavioral review. The site presents a consistent polling and survey purpose, with no login, payment, investment, wallet, or sensitive-data form detected. Behavioral testing did identify two suspicious inline scripts, elevated external activity in one run, and console errors; these are low-level implementation anomalies rather than evidence of phishing or impersonation because the same testing found no hidden forms, credential collection, wallet activity, cloaking, or malicious behavior. Available reputation coverage was clean, although not comprehensive. The site's apparent legitimacy is therefore evidence-consistent, while the operator's real-world identity remains independently unverified.

EVIDENCE

- The homepage and navigation describe Europe-focused public-opinion polling and survey participation; no login or payment form was present.
- Domain registration records show registration on 2015-12-31, with an age of 10.64 years.
- Archived records show first observation on 2018-08-05, last observation on 2026-06-10, and 9 years tracked.
- Behavioral testing recorded 2 suspicious inline scripts, 14 console errors, and a maximum external-activity ratio of 87.5%; it recorded 0 wallet-connect runs, 0 hidden forms, and 0 password forms sent externally.

Regulatory Verification Notes

The site's content is informational and does not present itself as a regulated financial, payment, or investment service, so the absence of a financial license claim is not by itself a scam indicator. The available legal and identity disclosures do not clearly establish a named real-world operating entity or an applicable research-organization registration; this is a transparency point for ordinary due diligence, not an identity contradiction. Registration through GoDaddy.com, LLC, a long-established domain, valid transport encryption, and identified mainstream hosting infrastructure support the assessment that the website is established in operation. A separate broker-reputation dataset produced no match, which is contextual only and not a licensing determination.

EVIDENCE

- The site is registered through GoDaddy.com, LLC; the recorded registrant organization is Domains By Proxy, LLC.
- The serving sensor identified AS15169, Google LLC, US.
- The TLS certificate is issued by WR3 at DV validation level and is valid through 2026-10-31T20:36:31+00:00.
- The homepage provides Terms Of Use and Privacy Policy navigation but does not display a clearly identified licensed or registered operating entity.

What to Verify Next

Before any future credential or payment interaction is introduced, an organization should independently confirm the operator's legal identity and contact route through an offline or separately sourced channel. The Terms of Use and Privacy Policy should be reviewed for data-use, survey-response retention, and dispute provisions. If the site later presents a paid service, the applicable merchant identity, refund terms, and payment-protection arrangements should be checked independently before transaction approval.

EVIDENCE

- The site's legal-document links are limited to Terms Of Use and Privacy Policy.
- The contact page publishes a P.O. Box in Palmyra, New Jersey, and a telephone number suitable for independent confirmation.
- No payment, account-login, or sensitive submission workflow was detected during the reviewed site interaction.

Summary Verdict

Available evidence supports a high-trust, low-risk posture for an apparently legitimate informational polling website. The conclusion is grounded in consistent site purpose, long-term registration continuity, clean evaluated reputation signals, and normal technical operation, but it does not independently prove the operator's real-world identity.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with observed edge infrastructure provided through Amazon.com, Inc. The origin server was not observable in this analysis; this protective architecture reduces direct exposure of the origin and is a mitigating security measure, not proof of legitimacy.

EVIDENCE

- CDN/WAF edge infrastructure is served through AS16509, Amazon.com, Inc., US.
- 2 edge IP addresses were observed, with 0 likely origin-IP candidates.
- The infrastructure resolution status was resolved, and the CDN was assessed as trusted.

Closing Assessment

Ordinary browsing and participation in the site's public-information functions is proportionate to the assessed posture; any later credential or payment engagement should follow independent identity, terms, and payment-protection checks.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of europepolls.com.

- The request stayed on europepolls.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-31. NOTED
- The earliest public archive of this site is from 2018-08-05. CLEAR
- It is hosted on GOOGLE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about europepolls.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
