

evacompltd.site: analysis blocked, no trust verdict

evacompltd.site

Verdict

NEEDS REVIEW

The site blocked our scan, so no score was assigned.

evacompltd.site blocked our automated scan and could not be verified.

The site blocked our scan, so nothing was confirmed either way. Treat it as unknown and verify the business another way.

Needs Review

Assessed 2026-09-29 by automated analysis.

What this site appears to be

Simple webserver directory index (Index of /) listing folders and a php.ini file; served by LiteSpeed. No forms, no monetization, no social links.

Evidence status and limitations

Evidence completeness: **INCOMPLETE**

- Capture was incomplete or blocked; this result requires review.
- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://evacompltd.site/

What evacompltd.site served when TrustSniffer captured it on 2026-09-29. The page may look different now.

Key findings

- The site blocked automated access, so TrustSniffer could not collect enough evidence to assign a score.

Full analysis

Overview

The website currently presents a raw web-server directory index rather than a developed business or service site. Visitors see folders named “cat,” “cgi-bin,” “mrcat,” and “mrcat29,” together with a “php.ini” file, with no stated commercial purpose, product offering, or interactive user journey.

Scam/Impersonation Risk

No contradictions were observed. The current page does not imitate a named brand, present a login or payment form, request credentials, or redirect visitors to external destinations. Its exposed directory structure is a configuration and presentation weakness, but the available page evidence does not indicate phishing, impersonation, active malicious behavior, or a confirmed blacklist finding. The limited site content means that benign presentation should not be treated as proof of an identified operator.

EVIDENCE

- The homepage is titled "Index of /" and lists server directories and a configuration file; it contains no forms, login workflow, payment mechanism, or external links.
- Browser testing recorded no external requests, wallet activity, hidden forms, suspicious scripts, cloaking, or clipboard activity.
- The domain was registered in 2026, approximately 0.0027 years before collection; the historical record contains 7 snapshots across 2026, with 1 year tracked.

Regulatory Verification Notes

The site does not provide a visible legal identity, business description, licensing claim, or regulatory reference on the directory page. Because no financial or other regulated service is presented, the absence of a licensing statement is a transparency gap rather than evidence of misconduct; the operator's real-world identity nevertheless remains unverified. The registration record identifies Spaceship, Inc. as registrar. Transport security is present through a domain-validated certificate, while the hosting arrangement reflects mainstream CDN infrastructure. No broker-dataset match was identified, but that contextual signal is not a legal or licensing determination.

EVIDENCE

- The homepage contains no company name, terms, privacy notice, licensing statement, registration number, or regulated-service description.
- The domain registrar is Spaceship, Inc.; the site is served on AS13335 by Cloudflare, Inc.
- The TLS certificate was issued by YE1 at DV validation level and is valid to 2026-12-27.

What to Verify Next

Before any sensitive or high-value engagement, an independent source should establish who operates the domain, why the directory is exposed, and whether any intended service exists beyond the current index. If the operator later presents a regulated or financial offering, its claimed authorization should be checked directly with the relevant regulator, and official contact channels should be confirmed through an independently obtained route.

EVIDENCE

- The homepage provides no business purpose or operator information from which service legitimacy can be independently established.
- The visible content is a server directory rather than a customer-facing service, so the intended use of the domain requires clarification.
- The current page exposes filesystem-style entries, warranting confirmation that the listing is intentional and that no sensitive files are accessible.

Summary Verdict

The overall posture is **Needs Review**, not an adverse fraud determination. The available evidence is consistent with a currently benign but minimally developed website, while confidence is limited because the operator

identity and business context are not independently verified.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a useful mitigating control against direct exposure of the hosting environment, but all observed addresses were edge infrastructure and the origin could not be independently assessed. This supports transport and perimeter resilience without establishing the legitimacy of the operator.

EVIDENCE

- Four observed IP addresses were identified as Cloudflare edge addresses; no origin candidate was identified.
- The resolved infrastructure uses Cloudflare CDN/WAF services in the United States.

Closing Assessment

Prospective users should complete independent operator and service verification before undertaking high-value financial activity or submitting sensitive information.

Written analysis generated 2026-09-29 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by capture.

01 Needs Review

- The site blocked automated access by TrustSniffer, or served nothing usable, so the analysis could not be completed.
Capture capture:blocked_or_unavailable

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of evacompltd.site.

- The request stayed on evacompltd.site. It was not redirected to another domain. CLEAR
- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-28. NOTED

- The earliest public archive of this site is from 2026-09-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about evacompltd.site at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
