Full analysis

Overview

Everest Web Deals is a SaaS and productivity-software website presenting Google Workspace add-ons, Microsoft Excel AI tools, and an AI customer-support assistant for schools, businesses, nonprofits, and public-sector teams, with monetization through subscriptions or software purchases.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or conflicting-identity indicators were observed. The homepage presents a coherent software-product offering, including Google Forms, Google Slides, Google Sheets, Excel, and customer-support tools, with no credential-harvesting forms, wallet activity, or financial-manipulation features identified. The site's historical record shows continuity rather than suspicious repurposing.

- The homepage identifies a SaaS/product landing page with Google Workspace and Microsoft productivity products.
- The domain was registered on 2022-02-06 and is approximately 4.48 years old.
- Archive records contain 4 snapshots from 2022-07-29 through 2024-10-02, covering 3 tracked years.
- External reputation checks reported zero malicious and zero suspicious detections, with no blacklist hit.

Regulatory Verification Notes

The site provides privacy, security, legal, pricing, support, and purchase-information resources. It does not claim a financial or other regulated license in the supplied evidence, so regulatory status is not established; this is a verification point rather than an indication of deception. The business model is ordinary commercial SaaS, with products installed through Google Workspace Marketplace or Microsoft AppSource.

- The homepage links to Security & Privacy, About, Contact, pricing, and legal-resource content.
- Amazon Registrar, Inc. is identified as the registrar.
- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate issued by YE2 (DV), valid to 2026-08-31 05:23:30 UTC.

What to Verify Next

For procurement or regulated use, confirm the contracting entity, applicable terms, and any sector-specific compliance requirements through the site's legal and support pages. Where a regulated service is contemplated, confirm licensing independently with the relevant jurisdictional registry.

- The homepage identifies products for schools, businesses, nonprofits, and public-sector teams.

- Pricing, support, privacy, and legal resources are available through the site navigation.
- Product installation is directed through Google Workspace Marketplace or Microsoft AppSource.

Summary Verdict

Everest Web Deals presents as a legitimate, established, and trustworthy software provider with a coherent business purpose and no observed contradiction or abuse signal. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by AWS CDN/WAF infrastructure, with observed traffic resolving through an Amazon edge address and no origin candidate exposed in the analysis. This provides a meaningful protective layer against direct origin exposure, while remaining a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Normal account access and standard product use are appropriate, with routine commercial and procurement checks applied where required by the organization.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about everestwebdeals.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
