Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the corporate website of Everwin International Development (HK) Ltd., presenting licensed-character display products, company information, product imagery, news, contact details, and partnership opportunities for apparent commercial sales and B2B distribution.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, brand-conflict, or confirmed blacklist indicators. The site's homepage and navigation describe a conventional corporate/product-showcase model, with no login form, payment solicitation, financial-service offer, or sensitive-data collection. Automated behavioral telemetry recorded wallet-related activity during two runs, but that signal is not corroborated by the site's visible content, which contains no cryptocurrency or wallet functionality and generated no external posts or external XHR activity; it is therefore treated as an uncorroborated behavioral anomaly rather than evidence of impersonation or a scam.

EVIDENCE

- The homepage presents product slides and navigation to Company Profile, Products, What's New, Contact us, and Partner pages; no login or sensitive-data form is present.
- Domain continuity dates to approximately 2000 (~25.55 years old), with 114 archive snapshots spanning 2001–2015 and historical tracking extending through 2025.
- The site's behavioral testing recorded 2 wallet-drainer runs, while also recording 0 external XHR requests, 0 external non-whitelisted XHR requests, 0 hidden forms, and no cloaking.

Regulatory Verification Notes

The Company Profile, Contact, and Partner sections support the presentation of a commercial corporate entity rather than a financial or regulated-services operation. The on-site disclosure picture remains unclear for independent identity confirmation: the site names Everwin International Development (HK) Ltd., but the operator's real-world identity is not independently verified in the available evidence. No financial-services license or registration number is claimed or identified; for this business model, that is a verification point concerning corporate and commercial transparency, not evidence of a scam. External reputation checks identified no malicious or blacklist result, although reputation coverage was partial, and the local broker-intelligence dataset returned no match.

EVIDENCE

- The site footer identifies "Everwin International Development (HK) Ltd." and the navigation provides Company Profile, Contact us, and Partner pages.
- Hosted on AS132056, SCICUBE-AS – RM B, 2/F 88 Kwai Cheong Road, HK.
- The site uses a valid DV TLS certificate issued by YE2, valid to 2026-10-04.
- The page content contains no financial solicitation, regulated-service claim, license number, or registration number.

What to Verify Next

Before credential or payment interactions, an independent corporate-registry check should confirm the named company and its current contact details. Any proposed purchase or distribution arrangement should be supported by independently confirmed merchant identity, written return and delivery terms, and payment methods offering appropriate transaction protection. Official contact channels should also be confirmed through an independent source rather than relying solely on details supplied by the website.

EVIDENCE

- The Products, Contact us, and Partner navigation indicates that commercial enquiries and possible product or distribution arrangements are the principal interaction paths.
- The homepage has no payment form, account-login workflow, or sensitive-data collection mechanism.
- The site is a corporate/product showcase rather than a platform presenting financial-account functionality.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture for ordinary browsing and business enquiry. The conclusion is qualified because the real-world operator identity is not independently verified, but no contradictory scam or impersonation signal was observed.

Infrastructure Integrity

The site resolves to a single apparent origin address hosted by SCICUBE-AS in Hong Kong, with no CDN or WAF identified. This is a conventional but relatively direct hosting arrangement; it provides less edge-layer separation than a CDN-backed deployment, while the site’s valid transport encryption remains a mitigating technical control.

EVIDENCE

- Resolved hosting infrastructure: 43.241.73.189 in Hong Kong, AS132056, SCICUBE-AS – RM B, 2/F 88 Kwai Cheong Road, HK.
- CDN detected: false; unique resolved IP count: 1; likely origin IP count: 1.

Closing Assessment

Normal low-risk browsing and routine business enquiries are proportionate, while independent identity, commercial-terms, and payment-protection checks should precede credential submission or financial commitment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of everwinhk.com.hk.

- The request stayed on everwinhk.com.hk. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2001-02-01. CLEAR
- It is hosted on SCICUBE-AS, from a server in HK. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about everwinhk.com.hk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
