Full analysis

Overview

evrencelimli.com is a WordPress-powered personal portfolio for Evren Celimli, presenting biographical material and creative work through sections for listening, watching, performances, press, and writing; its apparent purpose is informational rather than transactional or financial.

Scam/Impersonation Risk

The site content itself does not display common fraud mechanics: the homepage and linked portfolio pages contain no login form, payment request, deposit solicitation, wallet connection, or other sensitive interaction. However, this benign presentation is materially contradicted by a confirmed blacklist hit and multiple external malicious detections, creating a security concern that outweighs the site's personal-portfolio appearance for sensitive use. No conflicting legal identities or page-level brand impersonation were observed, but the available evidence does not independently verify the connection between the site and the person named on it.

EVIDENCE

- The homepage and portfolio pages present biography, music, performances, press, and writing, with no forms or financial solicitations detected.
- Domain registration evidence records creation on 2004-07-15; the domain age is 22.11 years.
- Web-archive telemetry records 77 snapshots spanning 2005–2026, with 22 years tracked.
- External reputation telemetry records 3 malicious detections, 1 suspicious detection, and a blacklist hit.

Regulatory Verification Notes

The About page describes Evren Celimli as a writer, resilience professional, and composer, but this is an on-site identity claim rather than independent proof of a real-world operator. The website appears informational and does not present a regulated financial service, licensing claim, or registration number; this limits regulatory relevance but does not resolve identity verification. A reputable certificate issuer and long-standing registration support technical continuity, while the external blacklist signal remains a separate and materially adverse reputational consideration.

EVIDENCE

- The About page identifies the subject as Evren Celimli and describes creative, professional, and educational background.
- The site is served on AS19871, NETWORK-SOLUTIONS-HOSTING / Network Solutions, LLC, US.
- Transport encryption uses a RapidSSL TLS RSA CA G1 certificate with DV validation, valid to 2027-01-27.

What to Verify Next

Before any sensitive interaction, independently confirm that the domain is endorsed by the person or organization represented on the site through a separately sourced or offline channel. Any future request to provide credentials, make payments, or access a regulated service should be checked against the relevant official registry and confirmed through independently obtained contact details rather than relying solely on the website.

EVIDENCE

- The About page supplies biographical context but does not independently establish the operator's legal identity.
- The site's own navigation is limited to informational sections: About, Listen, Watch, Performances, Press, and Words.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The website may be an authentic personal portfolio in presentation and behavior, but the external contradiction is sufficiently material that legitimacy remains only apparent and identity remains unverified.

Infrastructure Integrity

The site resolves through Network Solutions hosting on AS19871 in the United States, with no CDN or edge-IP layer detected. Its valid DV certificate is a positive transport-security control, but hosting and TLS protections mitigate delivery risk only and do not establish legitimacy or offset adverse reputation evidence.

Closing Assessment

Passive viewing is the proportionate use case; credentials, account access, and financial activity should be withheld unless the site’s identity and external security concerns are independently resolved.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about evrencelimli.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
