Full analysis

Overview

Exchange Rates UK is an established informational website providing live exchange rates, currency conversion and comparison tools, historical data, forecasts, financial news, and links to international money-transfer providers. Its apparent business model is free financial information supported by advertising, referrals, and audience monetization rather than custodial financial services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent informational purpose, with no detected phishing, brand impersonation, malicious behavior, or high-risk investment pattern. Its rate disclaimers appropriately state that information should be independently verified, and the site's established operating history and clean external reputation support a legitimate assessment.

- The domain was registered on 2005-12-23 and is approximately 20.62 years old.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- The homepage contains no login form, hidden sensitive form, or wallet-connection behavior.

Regulatory Verification Notes

The site presents informational market data rather than claiming to provide regulated custody or investment services. No license claim or registration number is supplied in the available site content, so regulatory status is not established for any third-party provider linked from the site; this is a transparency point, not an identity contradiction. Registration is through 123-Reg Limited t/a 123-reg, while the available third-party broker-reputation check returned no match.

- The homepage describes advertising, referral relationships, and newsletter monetization rather than custodial financial services.
- Domain registration is recorded through 123-Reg Limited t/a 123-reg, expiring 2028-12-23.
- The site's transport encryption uses a DV certificate issued by WE1, valid through 2026-09-25.

What to Verify Next

Before relying on any linked financial provider, independently confirm that provider's authorization and published terms with the relevant official registry. Rate-sensitive decisions should also be checked against independent market sources, consistent with the site's own disclaimer.

- The homepage explicitly advises independent verification of rate information.
- The homepage's sole detected form is a newsletter signup rather than a sensitive financial submission form.

Summary Verdict

The website presents as a legitimate, established, high-trust informational service with a coherent purpose and no observed scam or impersonation indicators. Normal interaction and standard use are appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than exposed origin addresses. This reduces direct origin exposure and is a mitigating security factor, but does not independently establish legitimacy.

Closing Assessment

Normal browsing, account login where offered, and standard site use are appropriate; consequential financial decisions should remain based on independently confirmed information and provider terms.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about exchangerates.org.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
