## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

The website is an established Portuguese-language regional journalism portal serving Rondônia and the wider Brazilian news market, presenting current reporting on politics, public safety, agribusiness, sports, community affairs and national events alongside classifieds and official notices.

### Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators or confirmed malicious reputation signals were observed. The long-running domain and exceptionally continuous archival record align with the current regional-news identity, with no evidence of suspicious repurposing. Its conventional login and password-recovery facilities submit no passwords to external destinations and therefore do not indicate credential theft.

- The domain registration record identifies a registration date of 10 January 2008 and an age of approximately 18.57 years.
- The web archive contains 579 snapshots from 28 January 2008 through 7 June 2026, spanning 19 tracked years; the historical record shows no semantic drift or suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no abuse reports and no threat-signature matches.
- The homepage contains two visible account forms—login and password recovery—with no hidden forms, untrusted form destination or externally submitted password field.

### Regulatory Verification Notes

The site identifies itself as a news publisher rather than a financial-services, investment or brokerage business, so the absence of a financial licence claim is consistent with its apparent activity and is not an adverse signal. The homepage names the publishing company, provides ordinary business contact details and connects the publication to established social-media channels. The domain registrant is also recorded as Empresa Jornalística Extra de Rondônia Ltda-ME, reinforcing the alignment between the website and its stated journalistic identity.

- The homepage identifies the publisher and displays a physical address, telephone contact and email contact.
- The homepage links the publication's presence on Facebook and Instagram.
- The registration record names "EMPRESA JORNALISTICA EXTRA DE RONDÔNIA LTDA-ME" as the domain owner and records expiry on 10 January 2028.
- The site's transport encryption uses a DV certificate issued by YR1, valid until 14 October 2026.

What to Verify Next

Enterprise onboarding may confirm the publisher’s current corporate particulars through the appropriate Brazilian business registry and independently validate official commercial-contact channels before placing advertisements, purchasing notices or entering contractual arrangements. Users enabling browser notifications should also review the permission request against their own notification preferences.

- The homepage’s apparent commercial surface includes classifieds and official notices, while detailed monetization and contracting terms are not shown in the supplied page content.
- The homepage presents a browser-notification permission prompt.
- The observed editorial page contained substantial current content across eight regional and national topic areas.
- The homepage displayed dated reporting through 31 July 2026, consistent with an actively maintained publication.

Summary Verdict

The website is a legitimate, established and trustworthy regional news outlet. Its identity, operating history, current editorial activity, technical controls and clean external reputation converge coherently, with no contradictory risk indicators.

Infrastructure Integrity

The site resolves directly to a likely origin server in Brazil and does not use a detected CDN or WAF. This is a conventional hosting arrangement; the exposed origin is an infrastructure characteristic rather than evidence of illegitimacy, while valid encrypted transport protects browser-to-site communications.

- The hosting infrastructure is served from AS262954, operated by VirtuaServer Informatica Ltda in Brazil, at the directly resolved address 186.226.56.4.
- Infrastructure resolution identified one likely origin address, no edge addresses and no detected CDN provider.

Closing Assessment

Normal interaction, including reading content, using the standard account login and conducting routine business with the publication, is appropriate; ordinary procurement controls remain suitable for material commercial commitments.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 76/100 |
| Identity verification confidence | 76%    |

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of extraderondonia.com.br.

- The request stayed on extraderondonia.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by com.br, across 2 name servers. NOTED
- The registration is paid up to 2028-01-10. CLEAR
- The earliest public archive of this site is from 2008-01-28. CLEAR
- It is hosted on AS262954, from a server in BR. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about extraderondonia.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
