

Is extraviados.es safe? TrustSniffer's moderate-trust assessment: 50/100

extraviados.es

Verdict

50

OUT OF 100

MODERATE TRUST

extraviados.es is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Spanish-language WordPress news/blog site covering consumer alerts (illegal Botox), local/international news, and recent articles. No forms requesting credentials or payments visible on the page.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

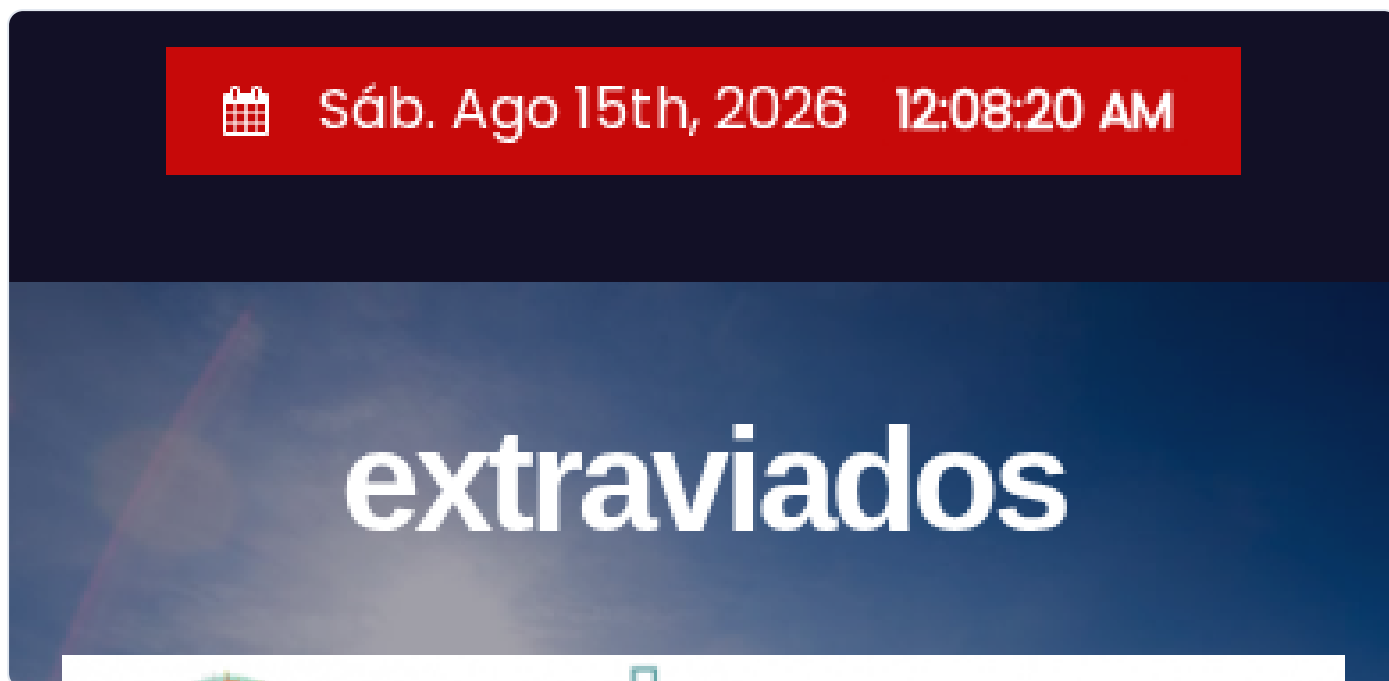

At a glance

The page as captured

<https://extraviados.es/>

What extraviados.es served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This Spanish-language website is a WordPress news and blog publication presenting consumer alerts, public-interest articles, local and international news, and trend-oriented reporting. Its apparent business model is ad-supported informational publishing rather than e-commerce, investment solicitation, or a service requiring user funds.

Scam/Impersonation Risk

The site's visible content does not show credential harvesting, payment forms, login functionality, wallet activity, or direct financial solicitation, and no page-level brand impersonation or phishing mechanism was identified. However, external reputation checks recorded two malicious and two suspicious detections, alongside listings identifying the domain as blacklisted; these are material contradictions that outweigh the otherwise benign presentation. The long-standing domain and historical continuity provide provenance context but do not resolve the current reputation concern.

EVIDENCE

- The homepage contains no login form, sensitive form, hidden form, or password submission mechanism.
- External reputation checks recorded 2 malicious and 2 suspicious detections, with the domain listed on external blacklists.
- Domain registration continuity dates to 2009, making the domain approximately 17.55 years old.
- Historical records contain 106 snapshots spanning 2009–2026, covering 18 tracked years.

Regulatory Verification Notes

The available evidence supports describing the publication model as informational, but the real-world operator remains unverified. The analyzed site does not present a claimed license or registration number, and its legal or governance disclosure is unclear; this is a transparency and verification gap rather than, by itself, proof of fraud. The site's technical transport security is valid, but domain-validated encryption establishes a protected connection, not the identity or regulatory standing of the publisher.

EVIDENCE

- The homepage identifies the site as a WordPress news/blog publication and presents no license authority or license number.
- The site is hosted on AS60458, ASN-XTUDIONET - XNET CORE SL, ES.
- The transport certificate is issued by YR2, uses DV validation, and is valid to 2026-10-07T07:01:40+00:00.

What to Verify Next

Before any sensitive interaction, independently establish the publisher's legal identity and confirm whether the entity responsible for the site is subject to any applicable media, advertising, consumer-protection, or other registration requirements. Contact details and official support channels should be confirmed through an independent route, and any future request for credentials, payment, downloads, or account creation should be assessed against the verified publisher identity rather than the site's appearance alone.

EVIDENCE

- The homepage provides informational articles but does not establish a verified legal operator.
- The analyzed page contains no payment, investment, or credential-submission workflow requiring immediate action.
- External reputation detections warrant independent confirmation before sensitive use.

Summary Verdict

The overall posture is **cautionary and unsuitable for unverified sensitive interaction**. The website appears to function as an ordinary informational publication at the content level, but the available evidence contains material external reputation contradictions and does not independently verify the operator's identity.

Infrastructure Integrity

The site resolves directly to a single hosting address, with no CDN or WAF identified and no separate edge layer observed. This architecture offers limited protective mediation against infrastructure-level exposure; the hosting arrangement should therefore be treated as a technical observation and not as evidence of legitimacy.

EVIDENCE

- The site resolves to 193.84.177.135 in Spain.
- Infrastructure analysis identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN or WAF vendor was detected.

Closing Assessment

Until the operator and relevant disclosures are independently confirmed, activity should remain limited to non-sensitive browsing, with no credentials submitted and no financial transaction initiated.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of extraviados.es.

- The request stayed on extraviados.es. It was not redirected to another domain.
 - The earliest public archive of this site is from 2009-02-01.
- CLEAR

CLEAR

- It is hosted on ASN-XTUDIONET, from a server in ES. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about extraviados.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
