

Is eyelash-ac.com a scam? TrustSniffer's high-risk assessment: 0/100

eyelash-ac.com

Verdict

0

OUT OF 100

CRITICAL RISK

eyelash-ac.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Local Osaka eyelash-extension academy site describing courses (1-day, standard, professional), prices, enrollment flow (prepayment required), FAQ, contact phone and physical address in Osaka.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What eyelash-ac.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an Osaka-based eyelash-extension academy presented as being operated by BLAU, offering professional training, salon-opening support, course enrollment, pricing information, FAQs, and local contact details for prospective students.

Scam/Impersonation Risk

The site's visible content is consistent with a local vocational-training business and does not contain an observed login form, wallet connection, phishing form, or explicit brand-impersonation signal. However, this benign presentation is materially outweighed by multiple external threat detections and a confirmed **blacklist** designation from external sources; the evidence includes malicious classifications from several scanners and a further suspicious classification. This creates a direct contradiction between the site's ordinary educational presentation and its external reputation, making credentials, payments, and other sensitive interactions inappropriate. No separate on-page identity contradiction was observed.

EVIDENCE

- The homepage presents an eyelash-extension academy, course enrollment, contact information, and a physical Osaka address without a login or sensitive-data form.
- External reputation assessment recorded 13 malicious classifications and 1 suspicious classification among 19 effective detections.
- The domain was registered on 2016-07-11 and is recorded as 10.12 years old.
- Historical records span 2018-08-07 through 2026-02-08, covering 9 years of tracked history.

Regulatory Verification Notes

The site describes paid vocational education and identifies BLAU as the operating academy, but the available disclosure does not independently verify the real-world operator. No regulatory license, registration number, or licensing authority is claimed in the supplied site content; this is a transparency and verification gap rather than, by itself, proof of fraud. The enrollment flow requires contractual acceptance and full advance payment, so the legal status of the operator, refund terms, and consumer protections should be established before any transaction. A separate broker-intelligence check produced no match, but that result is contextual only and is not a licensing determination.

EVIDENCE

- The academy's about and access content identifies BLAU, an Osaka location, and a physical business address.
- The enrollment-flow page states that the course fee is paid in full by bank transfer before lessons begin.
- Hosting resolved to AS7506, GMO-I-R1 - GMO Internet, Inc., JP.
- The site's TLS certificate is issued by YR1 at DV validation level and is valid to 2026-09-23.

What to Verify Next

An organization considering engagement should independently confirm the academy's legal operating entity and Osaka premises through an offline or independently sourced contact route, rather than relying solely on the website. The relevant Japanese vocational, consumer-protection, or business registry should be checked for any applicable registration or authorization. Before payment, obtain written terms covering cancellation, refunds, course deliverables, and the beneficiary of payment, and ensure that any payment method provides appropriate dispute protection. Until the external reputation findings are resolved, sensitive interaction should remain suspended.

EVIDENCE

- The about and access pages provide the business name, telephone contact, and physical location for independent confirmation.
- The course and FAQ pages describe the enrollment process and the services supplied, providing the basis for checking the promised deliverables against written terms.
- The payment stage is presented after course selection and contract completion, making the beneficiary and refund conditions material pre-transaction checks.

Summary Verdict

The website has a **critical trust posture** for sensitive interaction. Its apparently ordinary educational purpose does not offset the confirmed external threat and blacklist evidence, while the real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to one likely origin address rather than through a detected CDN or WAF, so there is no identified edge-layer mitigation separating the service from its hosting infrastructure. This is a technical exposure characteristic, not proof of malicious ownership, but it provides no protective infrastructure basis for reducing the external-reputation concern.

Closing Assessment

The appropriate enterprise disposition is to restrict activity to passive viewing and withhold credentials, payment information, and other sensitive data unless independent identity, transaction, and reputation checks produce a satisfactory resolution.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of eyelash-ac.com.

- The request stayed on eyelash-ac.com. It was not redirected to another domain. CLEAR
- Registration is published under GMO Internet Group, Inc. d/b/a Onamae.com. CLEAR
- DNS for this domain is served by muumuu-domain.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-11. NOTED
- The earliest public archive of this site is from 2018-08-07. CLEAR
- It is hosted on GMO-I-R1, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about eyelash-ac.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
