

Is facturama.mx legit? TrustSniffer's high-trust assessment: 90/100

facturama.mx

Verdict

90

OUT OF 100

HIGH TRUST

facturama.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Product/marketing site for Facturama: a cloud invoicing (CFDI 4.0) SaaS targeting Mexican SMEs. Includes feature descriptions, pricing plans, API integration, add-ons, support resources, and a free trial offer.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Facturama.mx is a professional SaaS platform for Mexican small and medium-sized businesses, presenting cloud-based electronic invoicing for CFDI 4.0 through tiered subscriptions, pay-per-use folio pricing, API integrations, add-ons, support resources, and a free-trial offer.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious reputation, or conflicting legal-identity signals. The homepage presents a coherent B2B invoicing model and includes standard signup and login functionality; captured behavior found no hidden forms, external password submission, wallet activity, clipboard manipulation, or cloaking. Marketing claims such as “+55 mil clientes” and “Más de 50 mil Pymes y Startups” are self-reported and not independently substantiated in the supplied evidence, but they are not, by themselves, indicators of impersonation or fraud. The site's established registration continuity, sustained archival presence, clean external reputation, and substantial traffic footprint support an apparently legitimate assessment, while the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage is categorized as a marketing and product landing page for SaaS billing and invoicing, with no page-level red flags or brand-impersonation indicators.
- The homepage states “+55 mil clientes ya confían en Facturama” and “Más de 50 mil Pymes y Startups,” representing marketing claims rather than independently verified customer counts.
- Registration record: created 2014-01-19; age 12.57 years; registrar GoDaddy.com.
- Archive history: 321 snapshots spanning 2014-06-25 through 2026-06-06, covering 13 years with a maximum recorded gap of 1 year.

Regulatory Verification Notes

The site's apparent business model is a conventional commercial software service rather than a financial product or broker offering. The captured navigation exposes “Nosotros,” contact, pricing, documentation, and support areas, but the supplied content does not establish a legal entity name, license, registration number, or identified regulator. That is a regulatory-disclosure gap requiring ordinary business verification, not evidence of a scam. The available reputation context is clean, and no relevant third-party broker match is present. The site's

legitimacy is therefore evidence-consistent and established in presentation, but not proof of the operator's real-world identity.

EVIDENCE

- The homepage and navigation identify Facturama as an electronic-invoicing software service with pricing, API documentation, support, contact, and company-information entry points.
- No license, registration number, or named regulatory authority is disclosed in the supplied page content.
- Hosting telemetry: served from AS20473, identified as AS-VULTR — The Constant Company, LLC, US.
- Transport security telemetry: TLS certificate issued by YR2 at DV validation level, valid to 2026-09-26 18:12:44 UTC.

What to Verify Next

Before credential or payment interactions, an enterprise or prospective customer should independently confirm the operating legal entity, review the applicable service, renewal, cancellation, refund, and data-processing terms, and confirm that payment protections are suitable for the intended transaction. Any applicable Mexican electronic-invoicing authorization or service-provider status should also be checked through the relevant official source. Contact details should be confirmed through an independent route before resolving account or payment disputes.

EVIDENCE

- The homepage offers a free trial and directs visitors toward signup, login, pricing, and contact workflows.
- The site publishes the telephone number 800 351 0250 on its contact pathway, providing a channel that can be independently validated.
- The captured forms are classified as signup, login, and contact forms, with no untrusted form destination or sensitive-form abuse identified.

Summary Verdict

The overall posture is high trust and low risk. Available evidence is consistent with an established, apparently legitimate website, and no contradiction supports a scam or impersonation concern. The operator identity remains independently unverified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves to a single likely origin address, 104.207.148.122, hosted by AS-VULTR — The Constant Company, LLC; no CDN edge IPs or detected CDN vendor are present. This is an identifiable conventional cloud-hosting posture and provides limited infrastructure reassurance, but hosting configuration alone is not proof of legitimacy.

Closing Assessment

Ordinary use may proceed subject to independent confirmation of merchant identity, contractual terms, and payment protections before credentials or payments are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of facturama.mx.

- The request stayed on facturama.mx. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com. CLEAR
- DNS for this domain is served by awsdns-23.org, across 4 name servers. NOTED
- The registration is paid up to 2028-01-19. CLEAR
- The earliest public archive of this site is from 2014-06-25. CLEAR
- It is hosted on AS-VULTR, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about facturama.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
