- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Facturatech is a Colombian SaaS marketing and sales website presenting electronic invoicing, electronic payroll, tax-document management, POS integration, and related compliance services for businesses, accountants, and smaller enterprises. Its apparent business model is subscription- and license-based software, supplemented by implementation, support, and reseller or distribution arrangements.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent business profile under the Facturatech name, with structured product navigation, registration and login paths, a contact form, and business-oriented content rather than deceptive investment, credential-harvesting, or impersonation mechanics. Technical review found no phishing indicators, hidden forms, wallet activity, cloaking, or brand-impersonation signal, while external reputation checks recorded no malicious or suspicious detections. The available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies Facturatech and describes electronic invoicing, electronic payroll, tax-document, POS, and compliance functions.
- The domain was registered on 2017-07-15 and is approximately 9.08 years old; registrar: GoDaddy.com, LLC.
- Historical records contain 85 archive snapshots spanning 2019-07-21 through 2026-05-15, covering 8 tracked years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing result.

Regulatory Verification Notes

The site presents services intended to help Colombian businesses comply with DIAN-related electronic-document requirements, including invoicing, payroll, support documents, RADIAN, and electronic titles of value. That service positioning does not independently establish that the operator is a regulated entity or that any particular regulatory authorization applies. The reviewed content does not provide a license or registration number, so regulatory status and the legal entity responsible for the service remain verification items rather than adverse legitimacy findings. The domain uses private registration details, which is an administrative ownership

limitation and does not by itself indicate misconduct. Available page content remains professional and business-specific, with no material red flags.

EVIDENCE

- The homepage and product navigation describe electronic invoicing, nómina electrónica, documento soporte, buzón tributario, RADIANT, and POS-related services.
- The site offers plans, purchasing paths, implementation and support information, and reseller or distribution licensing information.
- The website's transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid to 2026-08-30.
- The site is served through AS20454, identified as SSASN2 - SECURED SERVERS LLC, US.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm the legal entity operating Facturatech, establish whether the offered compliance services require authorization or registration, and check any applicable Colombian registry or regulator records. Commercial users should also review the applicable terms, service commitments, cancellation and return provisions, data-processing responsibilities, and payment-protection arrangements. Official contact channels should be confirmed through an independent route before sensitive account or billing matters are handled.

EVIDENCE

- The site provides a contact form and phone/email contact channels on its contact and marketing pages.
- The homepage includes registration, login, purchasing, and quotation paths, while the analyzed form set contained one contact form and no sensitive form.
- The reviewed content describes plans and licenses but does not display a license or registration number.

Summary Verdict

The overall posture is high trust and low risk, supported by convergent evidence of a mature, operational, and technically coherent business website. The conclusion is that the site is apparently legitimate and evidence-consistent with an established service, while independent confirmation of the real-world operator remains outstanding.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a meaningful defensive layer, and all observed addressing was associated with the CDN edge rather than an identified origin. The observed edge address was 108.170.7.215, hosted in the United States through SSASN2 - SECURED SERVERS LLC; this infrastructure is a mitigating security signal, not proof of the operator's identity.

Closing Assessment

Normal evaluation may proceed, with ordinary independent merchant-identity, contractual, and payment-protection checks completed before credentials or funds are committed.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of facturatech.co.

- The request stayed on facturatech.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-14. NOTED
- The earliest public archive of this site is from 2019-07-21. CLEAR
- It is hosted on SSASN2, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about facturatech.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
