## Full analysis

### Overview

FameThemes is an established ecommerce website offering free and premium WordPress themes, plugins, and add-ons, supported by product demonstrations, published one-time pricing, documentation, customer support, and account services.

### Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or confirmed malicious reputation signals were observed. The homepage presents a coherent commercial model, including free OnePress and Screenr themes and premium products priced from \$49 to \$89. This content aligns with the site's long operating history, substantial global traffic footprint, and consistent WordPress-marketplace identity. Interactive testing found no hidden forms, credential forwarding, clipboard interference, wallet-related behavior, cloaking, or suspicious scripts.

- The homepage identifies FameThemes as a WordPress theme and plugin marketplace and displays named products, live demonstrations, and transparent prices.
- The domain was registered on 20 May 2013 and is approximately 13.21 years old.
- The web archive contains 2,660 snapshots spanning 31 May 2013 to 3 August 2026, representing 14 years of tracked history with no suspicious repurposing detected.
- External reputation checks recorded zero malicious or suspicious detections, no phishing finding, and a global traffic rank of 8,341.

### Regulatory Verification Notes

FameThemes operates as a conventional software and digital-goods merchant rather than as a regulated financial service, so no financial-services licence is expected for the business model presented. The homepage exposes support, contact, pricing, documentation, and legal-policy links, although the supplied page evidence does not establish the legal entity named within those policies. Private domain-registration details are an ordinary administrative arrangement and do not conflict with the site's demonstrated identity or operating history.

- The homepage provides navigation to pricing, support, documentation, contact, and legal-policy resources.
- The homepage describes the offering as WordPress software and related add-ons; it makes no financial, investment, brokerage, or cryptocurrency proposition.
- The domain is registered through Name.com, Inc., with registration current until 20 May 2027.

- The site's transport encryption uses a WE1-issued domain-validated certificate, valid until 22 September 2026.

**What to Verify Next**

For procurement or material commercial use, the purchasing entity should confirm the contracting party and governing terms shown during checkout, review update and support entitlements for the selected product, and validate compatibility with its WordPress version and security baseline. Official contact channels may also be confirmed through the site's established account and documentation paths before enterprise deployment.

- The homepage provides account registration and sign-in functions for customer access.
- Product entries include live-demo controls that permit functional evaluation before purchase.
- Dedicated documentation and support paths are available for implementation and post-purchase assistance.

**Summary Verdict**

FameThemes presents as a legitimate, established, and trustworthy commercial website. Its identity, operating history, reputation, content, and observed behavior converge without material contradiction, supporting normal interaction, including account login, purchasing, and standard use.

**Infrastructure Integrity**

The site is protected by Cloudflare's mainstream CDN and WAF, with all observed addresses belonging to edge infrastructure; this reduces direct exposure of the origin environment but is a protective control rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., United States); eight observed addresses were Cloudflare edge endpoints.

**Closing Assessment**

Prospective customers may interact with the site normally, applying standard software-procurement and deployment controls appropriate to third-party WordPress components.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about famethemes.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
