

Is familyaddons.com a scam? TrustSniffer's high-risk assessment: 5/100

familyaddons.com

Verdict

5
OUT OF 100

CRITICAL RISK

familyaddons.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-18 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking distribution page for 'Family Addons' Minecraft mod (Fabric 26.3). Describes 80+ modules, provides download and install steps, FAQ, and compatibility notes. No payment, sign-up, or credential requests present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	3 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	4 months old Most scam domains are under a year old	RISK
Web archive	Archived since 2013 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YE1	NOTED

The page as captured

<https://familyaddons.com/>

What familyaddons.com served when TrustSniffer captured it on 2026-09-18. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a software-distribution page presenting Family Addons, a free Minecraft Hypixel SkyBlock modification for Fabric 26.3, with downloadable functionality intended for players rather than an account-based or payment-based service.

Scam/Impersonation Risk

The site's visible content is an official-looking mod-distribution page and does not request payment, registration, credentials, or wallet access. It promotes more than 80 modules, including features for dungeons, mining, farming, slayers, Kuudra, and general gameplay, and claims the software was formerly private before becoming free. Those content-level characteristics are comparatively benign, but they are outweighed by confirmed external threat detections and a confirmed blacklist result. The available evidence does not establish brand impersonation or a direct phishing form, yet the external security signals create a material risk that the downloadable content or distribution channel may be unsafe. No suspicious contact-email anomaly was identified in the supplied evidence.

EVIDENCE

- The homepage describes Family Addons as free software for Fabric 26.3, with more than 80 modules and no payment or sign-up requirement.
- External security assessment recorded three malicious and two suspicious detections, with threat flags from two major security vendors.
- The domain was identified on an external blacklist; this is a confirmed reputational contradiction despite the absence of payment or credential forms on the homepage.

Regulatory Verification Notes

The apparent business model is free software distribution rather than a regulated financial or payment service, so licensing is not inherently expected for the stated activity. Nevertheless, the reviewed material does not establish a legal operator, corporate identity, software publisher identity, or formal licensing or registration disclosure. The operator therefore remains unverified, and the site should not be treated as evidence of an accountable real-world entity. Historical records indicate that the domain has had an online presence over several years, but the current registration record is substantially more recent; this provenance inconsistency warrants independent validation rather than reliance on the site's presentation. A valid transport certificate and identifiable hosting arrangement provide technical continuity, not proof of legitimacy.

EVIDENCE

- The current registration record shows creation on 2026-05-17, with an age of approximately 0.34 years, and registrar Web Commerce Communications Limited dba WebNic.cc.
- Historical archive records span 2013-04-04 through 2021-12-03, covering 9 years of tracked history.
- The site is served on AS203273 through NetCraftersOU - NetCrafters OU, EE.
- TLS uses issuer YE1 with DV validation and is valid through 2026-12-16.

What to Verify Next

Before any download or execution, an independent project source should confirm that Family Addons is the genuine publisher and that the release corresponds to the stated Fabric version. The software should be checked through an independently obtained cryptographic hash, signature, or reputable distribution channel rather than relying solely on the page's download control. The homepage's installation and compatibility instructions should also be compared with an independently maintained project repository or community source, and the official support channels should be confirmed through an offline or separately verified route.

EVIDENCE

- The homepage supplies download, installation, FAQ, and compatibility guidance but does not provide an independently verified publisher identity.
- The page contains no login form, sensitive form, external password submission, or payment workflow.
- Automated behavior testing observed no external posts, wallet activity, clipboard manipulation, hidden forms, or suspicious inline scripts during the evaluated runs.

Summary Verdict

The website has a **critical trust posture** for interaction and software acquisition. The clean, non-financial page presentation does not offset the confirmed blacklist and malicious-detection signals, combined with an unverified operator identity and unresolved provenance concerns. Sensitive interaction with the site is not justified by the available evidence.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure of the underlying service, but all observed addressing was edge-based and the origin was not independently observable. This infrastructure arrangement can support operational resilience while also limiting direct verification of the hosting environment; it is therefore not evidence of legitimacy.

Closing Assessment

The appropriate posture is read-only evaluation pending independent validation of the publisher and software artifact; credentials, downloads, execution, and other sensitive actions should not proceed on the basis of this site alone.

Written analysis generated 2026-09-18 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of familyaddons.com.

- The request stayed on familyaddons.com. It was not redirected to another domain. CLEAR
- Registration is published under Web Commerce Communications Limited dba WebNic.cc. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-17. NOTED
- The earliest public archive of this site is from 2013-04-04. CLEAR
- It is hosted on NetCraftersOU, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about familyaddons.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
