

Is farmnews.com.br legit? TrustSniffer's high-trust assessment: 100/100

farmnews.com.br

Verdict

100

OUT OF 100

HIGH TRUST

farmnews.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Portuguese-language Farmnews homepage publishing current reporting and analysis about Brazilian agribusiness, livestock, grains, commodity prices, futures markets, management, policy, innovation, and sustainability. It displays advertisements, author bylines, company identity, privacy and usage policies, contact links, social-follow prompts, and an account login interface.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Portuguese-language agribusiness news portal that provides reporting and analysis on Brazilian livestock, grains, commodity prices, futures markets, farm management, policy, innovation, and sustainability, supported by advertising and commercial partnerships.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or confirmed malicious reputation findings were observed. The account-login interface is consistent with the portal's stated purpose: its form does not submit credentials to an untrusted external destination, and behavioral testing found no hidden forms, cloaking, clipboard manipulation, suspicious inline scripts, or cryptocurrency-wallet activity. Long-running archival coverage and an established public-traffic footprint further support continuity rather than a recently created deceptive operation. One external reputation engine returned an isolated suspicious classification, but this is not corroborated by malicious detections, the browser-safety assessment, abuse reports, page content, or observed behavior.

- The homepage presents current, attributed agribusiness journalism and contains no identified fraud indicators or deceptive financial solicitation.
- The login form on the homepage has no untrusted destination; no hidden forms, external password submission, cloaking, or brand impersonation was detected during successful interaction runs.
- The site has 291 archive snapshots spanning 2009–2026 (18 years tracked), with no suspicious repurposing or semantic drift established.
- External reputation telemetry records 0 malicious and 1 suspicious classification, no browser-safety malicious finding, no external blacklist finding, 0 abuse reports, and a global traffic rank of 575,639.

Regulatory Verification Notes

The homepage identifies an operating company and Brazilian CNPJ, while also providing privacy and usage policies, contact access, author bylines, and editorial categorization. These disclosures are appropriate for an advertising-supported news publisher, and the site does not solicit investments or deposits. No financial-services licence is claimed, but the observed publishing model does not itself indicate that such authorization is required. The available evidence does not supply the operator's literal legal name or CNPJ number, so their registry correspondence cannot be assessed within this review; this is a limited documentary verification point, not evidence of deceptive identity.

- The homepage identifies its operating company and Brazilian CNPJ and displays author attribution alongside current editorial content.
- The homepage provides privacy and usage policies, contact links, advertisements, and social-follow prompts consistent with a commercial publication.
- WHOIS records registration on 19 July 2016 (~10 years old), expiry on 19 July 2028, and Ivan Borba Formigoni as the registrant.
- The site is served from AS47583 (Hostinger International Limited); its transport encryption uses a YE2-issued domain-validated TLS certificate valid to 12 October 2026.

What to Verify Next

For enhanced vendor or institutional due diligence, the published legal operator and CNPJ should be matched against the applicable Brazilian corporate registry, and the policy documents should be checked for consistency with that entity. Official contact channels may be independently confirmed before entering into advertising, sponsorship, data-sharing, or other contractual arrangements. Organizations enabling user accounts should also confirm that authentication remains on the expected domain and apply normal password-management controls.

- The homepage supplies the company and CNPJ disclosures needed for an independent registry comparison.
- The privacy and usage-policy links provide the documentary basis for reviewing the operator's stated data-handling and contractual terms.
- The contact page and homepage navigation provide published channels that can be compared with independently sourced corporate records.
- The homepage contains one account-login form, making domain validation and standard credential controls relevant to account administration.

Summary Verdict

The site is a legitimate, established, and trustworthy agribusiness publication. Its identity disclosures, sustained editorial activity, historical continuity, benign observed behavior, and largely clean external reputation converge on a high-confidence trust posture. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Hosting is provided by Hostinger International Limited in an environment that resolves to four likely origin addresses, with no CDN or WAF identified. Direct origin visibility offers less shielding from infrastructure-level attacks than a protected edge architecture, but no associated abuse pattern was detected, and valid transport encryption protects browser-to-site communications.

Closing Assessment

Prospective users may proceed with ordinary browsing, account access, and standard engagement, applying routine password hygiene and proportionate corporate due diligence for any contractual relationship.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of farmnews.com.br.

- The request stayed on farmnews.com.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by dns-parking.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2028-07-19. [CLEAR](#)
- The earliest public archive of this site is from 2009-11-08. [CLEAR](#)
- It is hosted on AS-HOSTINGER, from a server in UA. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about farmnews.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
