Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Fashioncrib SA is a South African online fashion retailer offering branded footwear, jackets, and apparel at prices denominated in South African rand, supported by customer accounts, shopping-cart functionality, contact details, and store-policy information for direct-to-consumer sales.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or confirmed malicious reputation signals were observed. The retail presentation is internally coherent, while the domain's continuous historical use and clean external reputation materially reduce the likelihood of a recently created or repurposed fraud operation. Login and registration functionality follows the expected pattern for an e-commerce storefront: no hidden forms, untrusted form destinations, credential forwarding, cloaking, or clipboard interference was detected.

- Domain records identify Fashioncrib SA as the registrant; the domain was registered on 14 March 2022 and is approximately 4.38 years old.
- Archive records contain 28 snapshots spanning 9 May 2022 to 12 May 2026, covering five tracked years without semantic drift or suspicious repurposing.
- Independent threat-reputation checks recorded no malicious or suspicious detections, no search-browser security warning, and no reported abuse against the observed infrastructure.
- The shop page's login and registration forms remained on trusted destinations, with no hidden sensitive forms or password submission to external domains.

Regulatory Verification Notes

The available identity evidence is consistent: the storefront name corresponds with the registered organization, and no competing legal-entity name appears in the supplied material. The site operates as an ordinary goods retailer rather than a financial or investment service, so the absence of a financial-services licence claim is not adverse. Its visible links to privacy, shipping, returns, and billing policies provide an appropriate baseline disclosure framework, although the supplied evidence does not establish the detailed contractual content of those policies.

- The domain registration is held through GoDaddy.com, LLC and names Fashioncrib SA as the registrant organization, with registration extending to 14 March 2027.
- The shop page displays contact information, a physical address, and links for privacy, shipping, returns, and billing matters.
- The hosting infrastructure is served from AS30148, operated by SUCURI-SEC — Sucuri, US.
- The site's transport encryption uses a valid DV certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, valid until 10 September 2026.

What to Verify Next

Routine pre-purchase diligence should focus on commercial terms rather than website legitimacy. Prospective customers should review delivery territories and timelines, return eligibility, refund mechanics, and billing conditions before ordering; independently confirm the official contact channel and physical location where material value is involved; and assess product-authenticity or authorized-reseller representations for premium branded merchandise.

- The shop page provides product variants, listed prices, account facilities, and cart-based purchasing, making the applicable order and refund terms directly relevant.
- The storefront publishes policy links covering shipping, returns, privacy, and billing, which should be reviewed as the controlling transaction terms.
- The product catalogue uses numerous third-party brand names, making provenance and authenticity representations a normal consumer due-diligence consideration.

Summary Verdict

The website presents as a legitimate, established, and trustworthy e-commerce operation, supported by convergent identity, historical, reputational, and behavioral evidence. Normal interaction, including account login, registration, and standard purchases, is appropriate.

Infrastructure Integrity

The website is protected by Sucuri’s CDN and web-application firewall. Both observed addresses were Sucuri edge servers, and the origin server was not exposed during the assessment; this reduces direct infrastructure exposure but is treated as a security mitigation rather than independent proof of business legitimacy.

Closing Assessment

Prospective customers may proceed under ordinary e-commerce controls, retaining transaction records and using payment methods that provide standard dispute and chargeback protections.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fashioncrib.co.za.

- The request stayed on fashioncrib.co.za. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-14. NOTED
- The earliest public archive of this site is from 2022-05-09. CLEAR
- It is hosted on SUCURI-SEC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fashioncrib.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
