Full analysis

Overview

Fashionette is an established German online marketplace for premium and luxury fashion, presenting designer bags, clothing, shoes, jewelry, watches, accessories, sale items, and certified pre-loved products for commercial retail purchase.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail marketplace model with recognizable product categories, promotions, newsletter functions, shipping and returns information, customer support, and legal details. External reputation checks found no malicious or suspicious detections, no phishing indication, and no confirmed blacklist signal.

EVIDENCE

- The homepage presents an established luxury-fashion ecommerce model with product categories, pricing promotions, shipping, returns, and customer-support information.
- The domain was registered in 2008 and is approximately 17.6 years old.
- Web archives contain 2,140 snapshots spanning 2008–2026, covering 19 years.
- The site appears in the global top million by traffic, with a reported rank of 110060.

Regulatory Verification Notes

The legal and company-information areas provide ownership and commercial disclosures, including a reference to The Platform Group AG in the marketing-consent text. No financial-services licensing claim or registration number is evidenced, but the site operates as a retail marketplace rather than presenting a regulated financial product. Any licensing question is therefore a limited transparency matter, not an indicator of impersonation or fraud. A separate broker-reputation dataset produced no match.

EVIDENCE

- The homepage links to legal details, privacy information, shipping and returns policies, and customer support.
- The homepage identifies The Platform Group AG in its personal-data and marketing-consent language.
- Hosted on AS16509 (AMAZON-02 – Amazon.com, Inc., US).
- TLS certificate issued by YR2 using DV validation, valid to 2026-09-24.

What to Verify Next

Before material commercial activity, the purchaser should confirm that the checkout, delivery, returns, and customer-support details match the applicable order terms and retain transaction records. For jurisdiction-specific consumer or corporate-registration requirements, the relevant official registry can be consulted independently.

EVIDENCE

- The homepage provides shipping and returns information for review before purchase.
- The homepage provides customer-support and legal-information access points.
- The newsletter form requests email and date data and does not present a sensitive credential form.
- Observed browsing behavior showed no hidden forms, wallet connection, clipboard manipulation, or external password submission.

Summary Verdict

Fashionette presents a legitimate, established, and trustworthy ecommerce posture. Its identity, business model, historical continuity, page content, reputation signals, and technical operation converge without a contradictory risk signal. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with observed traffic terminating on AWS edge addresses and no origin candidate identified. This reduces direct exposure of the underlying service and is a mitigating infrastructure characteristic, although it is not independently proof of legitimacy.

Closing Assessment

Standard browsing, account activity, and ordinary purchases are proportionate to the site's established trust posture, subject to normal commercial checks on individual orders and applicable consumer terms.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fashionette.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
