Full analysis

Overview

Fashionista is an established editorial publication covering fashion, beauty, retail, careers, brands, shopping, and industry news, supported by advertising, sponsored content, events, newsletters, and related media offerings.

Scam/Impersonation Risk

No contradictions, impersonation indicators, phishing behavior, or confirmed malicious reputation signals were observed. The homepage presents a coherent news-and-editorial model with substantial topical content, standard navigation, and a newsletter form rather than credential-harvesting or financial-action mechanisms. The available evidence therefore supports normal interaction with the publication, including account login where provided. Evidence:

- The homepage identifies Fashionista as a fashion, beauty, retail, careers, and industry publication.
- The homepage contains one newsletter-signup form and no login, password, payment, wallet, or hidden sensitive forms.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing result.

Regulatory Verification Notes

Fashionista presents as a media and editorial business rather than a regulated financial service. Its apparent commercial model—advertising, sponsored and partner content, newsletters, events, and related media offerings—does not itself require a financial-services license. No distinct regulatory or broker affiliation is established by the supplied evidence, and no third-party broker match was identified; this is contextual information rather than a legal determination. Registration privacy is an administrative detail and does not create an identity contradiction.

- The domain was registered in 2000 and is approximately 26.42 years old.
- Registered through GoDaddy.com, LLC, with an expiration date of 2028-03-07.
- The site's transport certificate is issued by GlobalSign Atlas R3 DV TLS CA 2026 Q2, with DV validation and validity through 2027-01-23.

What to Verify Next

For any business relationship involving sponsorship, advertising, employment, or event participation, confirm the relevant commercial contact and contractual entity through independently sourced publication or corporate records. Standard editorial browsing, newsletter enrollment, and ordinary account use require no additional security restriction based on the supplied evidence.

- The homepage provides clearly separated sections for industry, careers, beauty, fashion schools, shopping, and style.
- The homepage’s stated revenue model includes advertising, sponsored content, newsletters, events, and related media offerings.
- The available page analysis found no deceptive financial behavior, brand impersonation, or suspicious browser activity.

Summary Verdict

Fashionista presents a legitimate, established, and trustworthy website with a coherent editorial purpose and no observed contradiction or abuse signal. Its overall posture supports normal interaction and standard use.

Infrastructure Integrity

The site is served through Fastly’s mainstream content-delivery infrastructure, which provides a mitigating layer for availability and edge-network exposure. This infrastructure supports the site’s technical integrity but is not, by itself, proof of legitimacy.

- Hosted on AS54113 (FASTLY - Fastly, Inc., US).
- Observed server IP: 151.101.194.98.
- TLS validation level: DV; issuer: GlobalSign Atlas R3 DV TLS CA 2026 Q2; valid to 2027-01-23T16:05:51+00:00.

Closing Assessment

Normal browsing, newsletter enrollment, account login where offered, and standard interactions are appropriate; any material commercial engagement should follow ordinary contractual and organizational due diligence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fashionista.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
