

Is fastfightintl.com a scam? TrustSniffer's high-risk assessment: 0/100

fastfightintl.com

Verdict

0

OUT OF 100

CRITICAL RISK

fastfightintl.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Ecommerce site for Fast Fight International, a manufacturer/exporter/wholesaler of boxing, MMA and fitness equipment and uniforms. Lists product categories, contact email and phone, and emphasizes custom design/printing and worldwide shipping.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What fastfightintl.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Fast Fight International is an ecommerce website presenting itself as a manufacturer, exporter, and wholesaler of boxing, MMA, fitness, protective, and martial-arts apparel and equipment. It offers product catalogues, custom sizing, printing and design services, worldwide shipping, and direct contact options for business and consumer orders.

Scam/Impersonation Risk

No conflicting legal identities or clear brand-impersonation indicators were observed across the available site content. However, the domain is subject to a confirmed blacklist finding, with multiple external security detections including Tier-1 vendor alerts; this is a material contradiction that outweighs the otherwise ordinary ecommerce presentation. Behavioural review also identified suspicious inline scripting and substantial changes to page structure after interaction. Abuse reports concerning the hosting IP are attributed to shared data-centre infrastructure, so they are not conclusive evidence against this specific website, but they remain a supporting adverse signal. No suspicious contact-email anomaly was identified in the supplied page findings.

EVIDENCE

- The homepage and product pages present a conventional manufacturer/exporter storefront, with no detected login form, wallet connection, phishing form, or explicit brand impersonation.
- External reputation checks recorded 12 malicious and 1 suspicious detections, with a confirmed blacklist status and alerts from Fortinet and Sophos.
- The domain was registered on 2020-06-23 and is approximately 6.16 years old.
- Archival records are sparse but span 2021-12-03 through 2026-03-17, representing 6 years of tracked coverage without evidence of category repurposing.

Regulatory Verification Notes

The website describes a commercial manufacturing and export business rather than a financial service, and the supplied pages do not claim a regulated licence or provide a licence number. That omission is a regulatory-transparency matter requiring independent confirmation where the proposed transaction or jurisdiction makes registration relevant; it is not, by itself, proof of fraud. The site provides product, contact, and social-navigation content, but the available evidence does not independently verify the operating legal entity. The absence of a broker-dataset match provides no positive or negative legal conclusion.

EVIDENCE

- The homepage identifies Fast Fight International as a manufacturer, exporter, and wholesaler and advertises custom orders and worldwide shipping.
- The About and Contact navigation is present, while the supplied business-model evidence records no claimed licence authority or licence number.
- Domain registration lists NAMECHEAP INC as registrar, with registration through 2027-06-23.
- The site's hosting is AS24940, HETZNER-AS—Hetzner Online GmbH, DE; its TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-14 11:46:29 UTC.

What to Verify Next

Before any purchase or disclosure of personal or payment information, an organisation should independently confirm the seller's legal name, operating address, export capability, and ownership of the supplied social accounts. Any applicable business-registration or import/export status should be checked with the relevant official registry, and payment should use a method providing documented dispute and chargeback protection. Contact details should be confirmed through an independently sourced business record rather than relying solely on the website.

EVIDENCE

- The About and Contact pages are the appropriate locations for confirming the trading entity, address, and commercial terms.
- The product pages should be checked for consistent pricing, stock information, shipping terms, returns, and warranty provisions before an order is placed.
- The homepage's worldwide-shipping and custom-order claims require confirmation through independently obtained trade or business records.
- The external detection and blacklist findings justify endpoint and payment review before sensitive interaction.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site has a plausible ecommerce presentation, but confirmed external threat and blacklist indicators create a decisive trust contradiction; apparent business identity should therefore not be treated as independently established.

Infrastructure Integrity

CDN/WAF protection is present, and the observed address is an edge address rather than an independently exposed origin. This provides a mitigating layer against direct infrastructure exposure, but it cannot validate the site's legitimacy or offset the adverse external reputation findings.

Closing Assessment

The appropriate enterprise action is to suspend login, credential submission, and financial transactions until the independent identity, transaction controls, and security reputation of the website have been resolved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 162.55.1.247 (Hetzner Online GmbH, Data Center/Web Hosting/Transit), 3% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fastfightintl.com.

- The request stayed on fastfightintl.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NAMECHEAP INC. [CLEAR](#)
- DNS for this domain is served by alphabytes.us, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-06-23. [NOTED](#)
- The earliest public archive of this site is from 2021-12-03. [CLEAR](#)
- It is hosted on HETZNER-AS, from a server in DE. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fastfightintl.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
