

Is fastsrunners.com a scam? TrustSniffer's high-risk assessment: 8/100

fastsrunners.com

Verdict

8

OUT OF 100

CRITICAL RISK

fastsrunners.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-24 by automated analysis. Classification confidence 55%.

What this site appears to be

This is a Namecheap-hosted parking/landing page indicating a hosting account has been created and providing links to cPanel, WebMail, support resources and blog/news. No forms or transactional elements are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://fastsrunters.com/>

hosted by  namecheap

What fastsrunters.com served when TrustSniffer captured it on 2026-09-24. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Namecheap parking and hosting landing page for fastsrunters.com, stating that a hosting account has been created and offering links for cPanel, WebMail, support, news, and blog resources; it does not present an operating business, commercial service, or transaction interface and appears to be a parked domain offered for sale.

Scam/Impersonation Risk

A confirmed blacklist listing and external threat detections create a high-risk basis for sensitive interaction. The available page content itself is a generic hosting-provider landing page with no login form, payment flow, wallet connection, or apparent brand impersonation, so the page does not independently demonstrate an active phishing mechanism. Those benign page characteristics do not offset the external reputation signal, and no independently verified operator identity connects the domain to a legitimate real-world organization. No identity contradiction or direct brand-impersonation finding was observed, but the confirmed blacklist status is sufficient to require a clearly cautionary posture.

EVIDENCE

- The homepage is identified as a Namecheap parking page and contains no forms, transactional elements, hidden forms, or password-submission fields.
- External reputation assessment recorded 1 malicious detection and 2 suspicious detections among evaluated results, with a Tier-1 security vendor flag also present.
- The domain was recorded as **blacklisted** by an external blacklist source.
- The domain registration record shows registration on 2026-09-03 and an age of approximately 0.05 years.

Regulatory Verification Notes

The site does not present an operating company, licensing claim, registration number, regulatory authority, or substantive legal disclosure. Because the observed page is a hosting-provider parking page rather than a functioning financial or commercial service, this is principally a verification gap about the intended operator and future use of the domain, not independent proof of fraud. The available evidence does not establish a regulated entity or independently verify the person or organization behind the domain.

EVIDENCE

- The homepage presents hosting setup and support material rather than legal, corporate, licensing, or regulatory information.
- The page states that nameservers and DNS propagation have been completed and directs visitors to cPanel, WebMail, and support resources.
- The site's transport encryption uses a DV certificate issued by SSL.com TLS Issuing RSA CA R1, valid to 2027-03-20T08:59:53+00:00.

What to Verify Next

Before any sensitive interaction, an enterprise or prospective user should independently establish who controls the domain and whether any future service presented through it belongs to a verifiable legal entity. Any licensing or registration claim that later appears should be checked directly against the relevant official registry, and support or ownership claims should be confirmed through an independently sourced contact route rather than links presented on the parked page. Login, credential submission, and financial activity should remain disabled unless those checks resolve the external reputation concern.

EVIDENCE

- The homepage currently identifies a hosting setup but does not identify an operating organization or regulated service.
- The available page contains provider links for cPanel, WebMail, and support, making independent confirmation of the intended operator necessary before use of those functions.
- The external assessment recorded a confirmed blacklist signal despite the page showing no direct transaction or credential form.

Summary Verdict

The website presents a critical sensitive-interaction risk rather than an established service suitable for trusted engagement. Its benign parked-page appearance is outweighed by the confirmed external reputation contradiction and the absence of independently verified operator identity. The appropriate posture is limited to non-interactive observation pending resolution of those issues.

Infrastructure Integrity

The site resolves directly to Namecheap infrastructure rather than a detected CDN edge, with one identified IP address and no protective origin-separation layer. Confirmed technical evidence places it on AS22612, operated by NAMECHEAP-NET / Namecheap, Inc. in the United States; this identifies the hosting environment but does not establish legitimacy. The infrastructure therefore offers ordinary hosting context, not a mitigating trust basis.

EVIDENCE

- Served from 198.54.115.158 on AS22612, NAMECHEAP-NET - Namecheap, Inc., US.
- Infrastructure analysis identified 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN was detected.
- TLS validation is DV, issued by SSL.com TLS Issuing RSA CA R1, with validity through 2027-03-20T08:59:53+00:00.

Closing Assessment

Sensitive actions should not be performed on the site at this stage; maintain a read-only posture and require independent identity, reputation, and any applicable regulatory checks before considering login, credential use, or financial activity.

Written analysis generated 2026-09-24 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fastsrunners.com.

- The request stayed on fastsrunners.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-03. NOTED
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fastsrunners.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
