

Is fastvps.ru legit? TrustSniffer's high-trust assessment: 100/100

fastvps.ru

Verdict

100

OUT OF 100

HIGH TRUST

fastvps.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Russian-language FASTVPS homepage offering managed virtual and dedicated servers, monitoring, backups, SSL certificates, and round-the-clock technical support. The page presents monthly prices, service features, customer reviews, business documentation, legal policies, support contacts, and the registered company's Saint Petersburg address.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Russian web-hosting provider offering prepaid VPS/VDS plans, dedicated servers, administration, monitoring, backup capacity, SSL certificates, and round-the-clock technical support, with published pricing, customer information, and business documentation supporting account-based service ordering and management.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious behavior were observed. The domain's long registration history and densely documented archival presence are consistent with an established operating website rather than a recently created or repurposed property. External reputation checks were clean, the site holds an established global traffic position, and observed browser interactions produced no external requests, data posts, hidden forms, cloaking, suspicious scripts, clipboard interference, or cryptocurrency-wallet activity.

- The domain-registration record shows registration in 2006, with an age of approximately 19.96 years; it is registered through RU-CENTER-RU.
- The web archive contains 1,484 snapshots from 25 September 2007 through 22 July 2026, covering 20 tracked years with no gap exceeding one year and no detected repurposing.
- Reputation telemetry recorded zero malicious and zero suspicious detections, no safe-browsing alert, no abuse reports, and no signature matches for the domain or its observed infrastructure.
- Traffic telemetry places the homepage at global rank 53,733, within the top one million websites.

Regulatory Verification Notes

The homepage identifies a registered company, provides a Saint Petersburg business address and sales contact details, and makes business documentation, contractual terms, privacy information, pricing, payment arrangements, and cancellation conditions available to visitors. This is a conventional hosting-services business rather than a financial or investment offering, and the supplied evidence contains no claim of financial-market authorization requiring validation. The transport and hosting records provide further operational accountability, although domain-validated TLS confirms control of the domain rather than independently authenticating the legal entity.

- The homepage presents the legal identity and physical business address alongside links to contractual and privacy materials.

- The service infrastructure is served from AS43298 by Storm Networks LLC in Russia; the observed server address is 185.71.67.74.
- The site's transport encryption uses a YR2-issued domain-validation certificate, valid until 20 September 2026.
- The homepage discloses cookie use and the collection of IP-address and location information.

What to Verify Next

Before procurement, the contracting entity named in the order documentation should be matched to the entity shown in the business materials. Enterprise customers should also confirm the selected plan's service scope, renewal and cancellation mechanics, backup responsibilities, support response commitments, data-location requirements, and any availability or recovery guarantees in the executed agreement.

- The homepage advertises virtual-server plans starting at 188 per month, making the selected tariff and included management scope relevant contractual checks.
- Dedicated-server and premium-support offers are presented from 6,972 per month, requiring confirmation of what installation, administration, and support obligations are included.
- A time-limited free-installation promotion is displayed through 31 August 2026, so its eligibility and post-promotion charges should be captured in the order record.
- The homepage describes FASTCARE monitoring for physical dedicated servers, supporting verification of alerting, escalation, and remediation responsibilities.

Summary Verdict

The website presents as a legitimate, established, and trustworthy commercial service. Independent technical, historical, reputational, behavioral, and on-page identity signals converge without material contradiction. Normal interaction, including account registration, login, ordering, and standard account use, is appropriate.

Infrastructure Integrity

The website uses CDN/WAF protection, with 136.243.255.76 observed as an edge address and a separate likely origin candidate identified. This arrangement reduces direct exposure of the service endpoint, although protective infrastructure is a security control rather than independent proof of legitimacy.

Closing Assessment

Prospective customers may use the website normally, applying standard procurement and contract-review controls appropriate to externally hosted infrastructure services.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fastvps.ru.

- The request stayed on fastvps.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by org., across 4 name servers. NOTED
- The registration is paid up to 2026-08-24. NOTED
- The earliest public archive of this site is from 2007-09-25. CLEAR
- It is hosted on StormNetworks, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fastvps.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
