

Is fatjimmyspizza.com a scam? TrustSniffer's high-risk assessment: 0/100

fatjimmyspizza.com

Verdict

0

OUT OF 100

CRITICAL RISK

fatjimmyspizza.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 75%.

What this site appears to be

Website for Fat Jimmy's Pizza, a local family-owned restaurant in Louisville, KY. Provides phone number, address, hours, menu links, and a contact form. No evident malicious behavior.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What fatjimmyspizza.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents Fat Jimmy's Pizza as a family-owned Louisville, Kentucky restaurant offering pizza, buffet dining, pickup, delivery, menus, store information, and a customer contact facility.

Scam/Impersonation Risk

The current homepage is coherent with a local restaurant and does not present a login page, credential-harvesting flow, cryptocurrency functionality, or other obvious fraud mechanism. However, this benign presentation is outweighed by confirmed domain-level blacklist activity and multiple external malicious or suspicious detections. Abuse reports associated with the observed Amazon shared-infrastructure address are not uniquely attributable to the restaurant website, but the confirmed blacklist status and corroborating external detections remain material indicators of sensitive-interaction risk. The domain has substantial registration and archival continuity, which supports an established historical presence but does not resolve the current threat findings or independently verify the present operator.

EVIDENCE

- The homepage describes Fat Jimmy's Pizza, displays restaurant information, and provides a non-sensitive contact form rather than a login or payment-credential form.
- External reputation checks recorded a confirmed blacklist and 3 malicious plus 2 suspicious detections, including a Tier-1 detection.
- The observed shared infrastructure address, 13.248.243.5, has 8 abuse reports; the attribution identifies Amazon Technologies Inc. CDN infrastructure rather than a unique site operator.
- Domain registration continuity records 1999-10-04 as the creation date, with an age of 26.9 years; archival records contain 565 snapshots from 2001-03-03 through 2026-07-05 across 26 tracked years.

Regulatory Verification Notes

The site's apparent business model is ordinary restaurant commerce, and the available content presents a business name, local address, operating hours, telephone contact, menu access, and a family-owned description. The real-world operator is nevertheless unverified, and the available content does not establish a legal entity, regulatory registration, or licensing status. For this type of business, that absence is a verification gap rather than standalone evidence of a scam. A known broker-intelligence dataset produced no match, but that is only contextual reputational information and is not a licensing or legal determination.

EVIDENCE

- Hosting telemetry records AS16509, operated by AMAZON-02 - Amazon.com, Inc., US.
- The site's TLS certificate is issued by GoDaddy TLS Intermediate CA DV - R1v1 at DV validation level and is valid through 2026-11-20.
- The available homepage content does not display a company registration number, license number, or named legal entity beyond the trading name "Fat Jimmy's Pizza."

What to Verify Next

Before placing an order or submitting information, an independent offline or locally authoritative source should confirm that the restaurant name, Louisville address, telephone details, and ordering channels correspond to the intended business. Any delivery or payment flow should be checked to ensure it remains within an expected, protected merchant or delivery-provider environment. File uploads through the contact function should be avoided unless their business purpose and destination are independently confirmed.

EVIDENCE

- The homepage provides a telephone contact, street address, operating hours, menu access, pickup instructions, and a third-party delivery option that can be compared against an independent local source.
- The homepage contact form accepts a name, email address, and file attachment, creating an information-submission path that warrants confirmation before use.
- The page uses reCAPTCHA and reports successful loading, but these technical features do not establish operator identity or transaction safety.

Summary Verdict

The website should be treated as a **critical sensitive-interaction risk**. Its plausible local-business presentation and long-running domain history do not overcome the confirmed external threat and blacklist indicators, while the operator's real-world identity remains unverified.

Infrastructure Integrity

The site is delivered through a CDN/WAF architecture with observed Amazon edge addresses and no identified origin candidate. This reduces direct exposure of the underlying server and can support operational resilience, but protective delivery infrastructure is only a mitigating control and does not establish legitimacy or offset the external reputation findings.

Closing Assessment

Passive viewing is the proportionate use case; ordering, submitting files, or providing credentials or financial information should wait until the business and transaction path have been independently confirmed.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page exchanged network traffic with destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC

- The page made background requests to destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 8 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 19% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fatjimmyspizza.com.

- The request stayed on fatjimmyspizza.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-04. NOTED
- The earliest public archive of this site is from 2001-03-03. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fatjimmyspizza.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
