

Is feednews.com legit? TrustSniffer's high-trust assessment: 95/100

feednews.com

Verdict

95

OUT OF 100

HIGH TRUST

feednews.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

A Finnish-language news aggregator page (Opera News) listing headlines and links to external publishers. Content appears to be headline snippets and source attributions; no forms or financial solicitations present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Finnish-language Opera News aggregator presenting headline snippets, timestamps, and source attributions from publishers such as Kauppalehti, Ilta-Sanomat, Yle, Helsingin Sanomat, and MTV Uutiset. Its apparent business model is to direct visitors to third-party news articles, likely supported by advertising or referral traffic, rather than to provide financial, transactional, or account-based services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents ordinary news content without financial solicitations, credential-harvesting forms, wallet functions, or misleading brand-impersonation indicators. External reputation checks were clean, and the site's established historical presence and strong traffic footprint support an apparently legitimate, low-risk content-site posture. The observed external network activity is consistent with a news aggregator communicating with third-party publishers, although source destinations should still be treated as separate websites.

EVIDENCE

- The homepage contains Finnish news headlines and publisher attributions, with no login form, sensitive form, or financial solicitation.
- Behavioral testing detected no hidden forms, password-exfiltration forms, cloaking, wallet activity, clipboard manipulation, or drainer behavior.
- The domain was registered on 2003-11-22 and is approximately 22.73 years old.
- Historical records contain 212 snapshots, first seen on 2000-03-01 and last seen on 2026-07-18, covering 27 tracked years.

Regulatory Verification Notes

The site is an informational news aggregator rather than a service presenting regulated financial products, so no financial license claim is expected from the homepage. Its visible policy navigation includes Privacy Statement, Terms of Service, and DMCA pages; however, the supplied evidence does not independently verify the real-world operator behind those pages. This is an identity and disclosure point for ordinary due diligence, not evidence of impersonation or fraud. A separate broker-reputation comparison produced no match, which provides contextual support but is not a licensing determination.

EVIDENCE

- The homepage identifies the service as “Opera News” and provides links to Privacy Statement, Terms of Service, and DMCA pages.
- The domain registrar is NameWeb BVBA; the recorded registration expiration is 2026-11-22T16:32:45Z.
- The site is served on AS39832 by NO-OPERA - Opera Norway AS, NO.
- The transport certificate is DV-validated and issued by Trust Provider B.V. TLS RSA CA G1, valid to 2026-08-30T23:59:59+00:00, with 19 days remaining.

What to Verify Next

Before any future credential or payment interaction, independently confirm the operator name, jurisdiction, and official contact channels through a trusted external source rather than relying solely on the site’s own policy pages. The Terms of Service and Privacy Statement should be reviewed for the responsible legal entity, data-processing arrangements, and dispute provisions; the DMCA page should be checked for a consistent designated-operator identity. Any article link should be assessed as a separate publisher interaction, with normal browser and payment protections maintained if an external destination requests them.

EVIDENCE

- The homepage provides publisher names and article-source attributions that can be cross-checked independently.
- The legal-policy links provide the appropriate locations for confirming responsible-entity and data-handling details.
- No account, purchase, or payment workflow was present in the observed homepage experience.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. The site’s identity is not independently verified, so operator legitimacy should be described as apparent rather than proven.

Infrastructure Integrity

The site resolves directly to a single identified hosting address in Norway, with no CDN or WAF layer detected in the supplied infrastructure data. Its hosting and network posture is identifiable and technically coherent, but infrastructure characteristics remain mitigating context rather than proof of legitimacy.

Closing Assessment

Normal browsing is proportionate; if credentials or payments are introduced in a future interaction, ordinary independent checks of the operator, applicable policies, and payment protections should be completed first.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of feednews.com.

- The request stayed on feednews.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NameWeb BVBA. [CLEAR](#)
- DNS for this domain is served by awsdns-18.org, across 4 name servers. [NOTED](#)
- The registration is paid up to 2026-11-22. [NOTED](#)
- The earliest public archive of this site is from 2000-03-01. [CLEAR](#)
- It is hosted on NO-OPERA, from a server in NO. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about feednews.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
