Full analysis

Overview

The website is a German automotive e-commerce store operated by DF Automotive GmbH, offering wheels, tires, and complete wheel sets with vehicle-fitment tools, promotions, financing, shipping and returns information, warranties, and automotive guidance.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail model, including product categories, vehicle compatibility tools, customer support, a 30-day withdrawal policy, financing information, and manufacturer warranty offers. Behavioral testing found no phishing indicators, hidden forms, wallet activity, cloaking, or suspicious script behavior, while external reputation checks found no malicious or suspicious detections.

- The homepage identifies the business as an automotive retailer operated by DF Automotive GmbH and presents wheels, tires, and complete wheel sets.
- The site's historical record contains 407 snapshots spanning 2001–2026, with 26 years tracked.
- The domain is registered from 2001 and is approximately 24.9 years old.

Regulatory Verification Notes

The site is a conventional automotive retailer rather than a financial or investment service, and no regulated-license claim is presented or required by the stated business model. Legal/company references, financing information, shipping terms, returns information, and warranty material support ordinary e-commerce transparency. The available external reputation context does not identify a broker match or adverse finding; licensing should therefore be treated as not applicable unless the site introduces separately regulated services.

- The homepage provides customer support, financing, shipping, returns, and warranty information.
- The site has an established public traffic footprint within the global top one million, with a recorded rank of 115670.
- The site is served through AS24940, operated by HETZNER-AS – Hetzner Online GmbH, DE.
- TLS uses issuer YR1, DV validation, and is valid through 2026-09-26.

What to Verify Next

Before a material purchase, the prospective customer should confirm that the legal notice, payment recipient, delivery terms, and return procedure remain consistent at checkout. For financed purchases, the applicable

financing terms should be reviewed separately from the product description, and warranty coverage should be retained with the order documentation.

- The homepage displays financing, shipping, returns, and manufacturer warranty information.
- The product catalogue includes vehicle-fitment functionality and ready-mounted wheel sets.
- Customer support contact details and a login function are presented on the homepage.

Summary Verdict

The site presents as a legitimate, established, and trustworthy commercial website with a coherent operating model and no observed scam, phishing, impersonation, or malware indicators. Normal interaction, including account login and standard purchasing activity, is appropriate.

Infrastructure Integrity

The website benefits from CDN/WAF protection, with observed traffic associated with AS24940 and Hetzner Online GmbH; the observed address is an edge server and no origin server was exposed during analysis. This reduces direct origin exposure but is a mitigating infrastructure measure rather than proof of legitimacy.

Closing Assessment

Standard account use and purchasing are appropriate, with ordinary transaction-level review of order, payment, delivery, and return details.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about felgenshop.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
