Full analysis

Overview

felipesena.com.br is a personal portfolio for Felipe Sena, presenting Shopify store development, e-commerce design, product creatives, and social-media assets as freelance services delivered through direct client engagements.

Scam/Impersonation Risk

No contradictions were observed: the available evidence identifies no phishing, brand impersonation, malicious activity, or conflicting legal identities. The homepage presents a coherent service model rather than investment, cryptocurrency, financial-return, or credential-harvesting activity; it contains no login form or sensitive-data form. Claims such as “official Shopify partner,” more than five years of experience, over 157 delivered stores, and more than 100 Workana reviews are presented as portfolio credentials, but remain self-asserted until independently confirmed.

EVIDENCE

- The homepage is classified as a portfolio and service landing page focused on Shopify development, e-commerce design, and social-media creatives.
- The homepage contains no login form, hidden form, sensitive form, wallet connection, or cryptocurrency-related feature.
- External reputation observations recorded no malicious or suspicious result, no confirmed phishing signal, and no brand-impersonation indicator.
- Archive telemetry records 1 snapshot in 2021, with 1 year tracked; the historical analysis found no suspicious repurposing or semantic drift.

Regulatory Verification Notes

This is a freelance creative-services website rather than a financial or investment platform, so the absence of a financial licence claim is not, by itself, a negative indicator. The site presents a CNPJ and references client testimonials, but the real-world operator identity remains independently unverified and the available disclosure of business governance is unclear. The appropriate conclusion is therefore that the business presentation is evidence-consistent with a legitimate freelance practice, not that the operator's identity or corporate status has been proven. The available third-party broker context contains no matching record and should be treated only as contextual reputation information.

EVIDENCE

- The homepage identifies Felipe Sena and presents a CNPJ as a business identifier.
- The homepage includes client testimonials, FAQs, portfolio examples, and a stated service process.
- Domain history is dated to 2021, with a reconciled age of 4.722792607802875 years.
- The domain uses GoDaddy as registrar; hosting telemetry identifies AS13335 operated by CLOUDFLARENET - Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-14T02:03:47+00:00.

What to Verify Next

Before a high-value engagement, independently confirm the presented CNPJ through the relevant Brazilian business registry and verify that the named individual or business is the contracting party. Shopify-partner status and Workana review history should be checked through their respective official channels, and proposed statements of work, payment terms, refund conditions, and deliverables should be documented before funds or sensitive project access are exchanged. Official contact channels should also be confirmed through an independent route.

EVIDENCE

- The homepage provides the business identifier and the claims concerning Shopify partnership, delivered stores, experience, and Workana reviews.
- The homepage shows portfolio projects and service descriptions but does not itself provide independent registry or platform-verification links.
- Behavioral testing completed 2 successful runs, with 0 wallet-connect runs, 0 wallet-sensitive runs, 0 clipboard-hijack detections, and 0 suspicious inline-script detections.

Summary Verdict

The site has a moderate-trust posture. Its content is coherent with a low-risk freelance design business and no scam or impersonation contradictions were observed, but independent operator verification is incomplete and the available evidence does not support treating the site as a fully established, independently authenticated business identity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge servers rather than identifiable origin infrastructure. This reduces direct exposure of the hosting origin and is a mitigating technical control, but it does not independently establish the legitimacy of the operator or the accuracy of the site's business claims.

Closing Assessment

Routine browsing and evaluation of the portfolio are proportionate, while sensitive access, material payments, or high-value engagements should follow the independent identity, platform-status, and contracting checks described above.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about felipesena.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
