What festajuninadonipo.com.br served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is an informational event-ticketing website for Festa Junina do Nipo, a cultural festival associated with Clube Nipo de Brasília. It presents event dates, venue information, food and cultural activities, visitor policies, FAQs, and ticket-purchase guidance, with an apparent business model based on event admission and related vendor participation.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, confirmed blacklist, or conflicting legal identity. The homepage provides coherent event information, including the festival name, venue, dates, activities, ticketing arrangements, and FAQs. Automated testing did identify external network requests and posts, together with console errors, but it found no login form, hidden sensitive form, wallet connection, wallet-drainer behavior, clipboard manipulation, or cloaking. In context, those technical observations do not establish an abuse pattern or undermine the site's low-risk event-page profile.

EVIDENCE

- The homepage identifies Festa Junina do Nipo, Clube Nipo de Brasília, the June 2025 event dates, venue, activities, ticketing arrangements, and visitor policies.
- The domain was registered on 2016-02-24 and is approximately 10.49 years old.
- Historical coverage records 58 archive snapshots from 2016-06-04 through 2026-04-13, with 11 years tracked.
- Behavioral testing recorded 32 external XHR requests, 26 external posts, 6 console errors, 0 hidden forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 cloaking detections.

Regulatory Verification Notes

The captured content is an event-information page rather than a financial-services or investment offering. It identifies the event and venue but does not present a licensing claim, registration number, or separate regulatory status; this is a disclosure gap to clarify if a formal commercial engagement is contemplated, not evidence of a scam. The available third-party broker context contains no match, which is limited reputational context and not a licensing determination. The site's established registration continuity, identifiable hosting, valid transport encryption, and clean supplied reputation signals are consistent with an established website, although the real-world operator identity remains independently unverified.

EVIDENCE

- The site is served from AS47583, operated by AS-HOSTINGER — Hostinger International Limited, CY.
- The site's TLS certificate uses DV validation, was issued by YE2, and is valid to 2026-10-14 01:29:22 UTC.
- The homepage contains event and ticketing information but no stated license, registration number, or regulatory authority.

What to Verify Next

Before any credential or payment interaction, independently confirm that the event organizer, venue, dates, and ticketing arrangements correspond to current information published by the venue or another independently sourced official channel. Confirm the applicable admission, refund, cancellation, and payment-protection terms before completing a transaction. For a broader commercial relationship, obtain the organizer's legal-entity details and confirm any event-specific permits or registrations with the relevant Brazilian authority where applicable.

EVIDENCE

- The homepage supplies the event's identifying details and venue information for independent comparison.
- The page states that tickets are available through Sympla or at the event entrance, providing two channels whose authenticity and current availability can be checked independently.
- The page's FAQ distinguishes admission rights from food pricing and states that participating restaurants set their own prices, making those terms appropriate for confirmation before purchase.

Summary Verdict

The overall posture is **high trust and low risk**, with evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradictions. The principal qualification is that the real-world operator identity is not independently verified.

Infrastructure Integrity

Network resolution indicates direct hosting rather than a CDN/WAF edge, with two likely origin addresses. This provides less edge-layer shielding than a proxied deployment, but the infrastructure is resolved and this posture does not, on its own, indicate malicious activity.

Closing Assessment

Normal browsing and ordinary event-related use are proportionate to the assessment; independent organizer, transaction-term, and payment-protection checks should be completed before submitting credentials or payment details.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of festajuninadonipo.com.br.

- The request stayed on festajuninadonipo.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2029-02-24. CLEAR
- The earliest public archive of this site is from 2016-06-04. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about festajuninadonipo.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
