Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

FilmDaily is an established entertainment and news publisher covering film, television, lifestyle, technology, quizzes, and related cultural topics. Its homepage presents editorial articles, videos, polls, competitions, and newsletter functionality within an advertising-supported business model that includes personalised advertising, partner content, and branded partnerships.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious-content, or blacklist-related indicators. The homepage contains substantial editorial content and does not present a login or sensitive transaction form. Runtime analysis did identify hidden forms during both observed interaction runs, but the page-level form inventory identifies cookie-consent, newsletter/signup, and search functions rather than password or payment collection; this is therefore a limited behavioural irregularity, not evidence of impersonation. The site's historical continuity, clean external reputation, and established audience footprint support an apparently legitimate publishing operation, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage is titled "Home – Film Daily" and contains extensive sections for News, TV, Life, Tech, Travel, Sports, Quizzes, and related editorial content; no brand-impersonation indicators were identified.
- The domain was registered in 2017 and is approximately 9.43 years old through 2027-03-08; the registrar is Tucows Domains Inc.
- Historical records show 5,000 archive snapshots spanning 2018–2022, covering 5 tracked years with a maximum gap of 1 year and no detected repurposing.
- Evaluated reputation checks recorded 0 malicious detections and 0 suspicious detections; the site has traffic rank 82838 and is within the top 1 million domains.

Regulatory Verification Notes

FilmDaily's apparent activity is informational publishing rather than a regulated financial service. The available homepage content does not present a regulated-service license claim or license number, so any regulated status would require separate confirmation if a partner promotion, competition, subscription, or commercial offering creates such an obligation. This is a disclosure and verification matter, not evidence of a scam. The

publisher's content-rich presentation, sustained historical presence, and clean reputation are consistent with an established site; however, the evidence does not independently connect the website to a verified legal entity.

EVIDENCE

- The homepage describes an ad-supported news and entertainment publisher using advertising, partner content, branded partnerships, and a consent-management platform for personalised advertising.
- The site is served from AS22611 (INMOTION – InMotion Hosting, Inc., US).
- The site's TLS certificate uses issuer YE1, has DV validation, and is valid through 2026-11-03T17:26:09+00:00.
- The homepage contains cookie-consent, newsletter/signup, and search forms, with no sensitive form identified in the page analysis.

What to Verify Next

Before any credential or payment interaction associated with a partner promotion, subscription, competition, or commercial offer, independently match the responsible merchant or publisher to authoritative corporate information and confirm the applicable terms, refund or return arrangements, and payment-protection mechanisms. Official support and contact channels should also be confirmed through an independent route rather than relying solely on a page-level contact path.

EVIDENCE

- The homepage presents multiple editorial and promotional areas, including competitions, resources, and partner-style content, creating distinct counterparties that may require separate identity checks.
- The site's stated business model includes advertising, partner content, and branded partnerships; transaction terms may therefore vary by associated provider.
- The available evidence does not independently verify the real-world operator identity.

Summary Verdict

The overall posture is high trust and low risk, and the evidence is consistent with an established, apparently legitimate website. No contradictory signals were identified, but the operator's real-world identity remains unverified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves through direct hosting on InMotion Hosting rather than a detected CDN or WAF edge, with one likely origin address identified. This provides a conventional, attributable hosting arrangement but does not independently establish legitimacy.

Closing Assessment

Ordinary informational use is proportionate to the assessed posture; before submitting credentials or payment details, standard independent merchant-identity, return-policy, and payment-protection checks should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of filmdaily.co.

- The request stayed on filmdaily.co. It was not redirected to another domain. CLEAR
- Registration is published under Tucows Domains Inc.. CLEAR
- DNS for this domain is served by inmotionhosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-08. NOTED
- The earliest public archive of this site is from 2018-02-04. CLEAR
- It is hosted on INMOTION, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about filmdaily.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
