Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents itself as the institutional site of Fundação Instituto de Pesquisas Econômicas (Fipe), offering economic indicators, research, publications, seminars, partner information, and educational services including MBA, extension, and professional courses. Its apparent business model is an established research and education organization supported by publications, paid courses, consulting, and institutional contracts.

Scam/Impersonation Risk

No scam, phishing, impersonation, or other identity contradictions were observed. The site's homepage and institutional navigation consistently present an economic research and education organization, with no evident financial solicitation, crypto activity, deceptive brand use, or credential-harvesting workflow. Automated interaction did observe a hidden form and substantial DOM changes, but no login form, external password submission, wallet connection, or wallet-drainer behavior was identified; these are implementation signals rather than evidence of impersonation. The available reputation checks were clean, supporting a low-risk interpretation.

EVIDENCE

- The homepage identifies Fundação Instituto de Pesquisas Econômicas — Fipe and presents indicators, research, publications, seminars, and educational content.
- The domain was registered on 2005-11-10 and is approximately 20.77 years old.
- The web archive records 3,082 snapshots spanning 2008-05-18 to 2026-08-06, with 19 years tracked.
- Interactive testing recorded 1 hidden form, 0 password external forms, 0 wallet-connect runs, and 0 wallet-drainer runs.

Regulatory Verification Notes

The About, Quem Somos, Contact, Privacy Policy, and institutional pages provide a coherent organizational presentation and identify Fipe as the apparent institution behind the site. The site's stated activities—economic indicators such as IPAC, IPC, FipeZap, vehicle pricing, and salary data; research and publications; MBA and extension education; seminars; and consulting—are consistent with an informational and educational research institute rather than an unlicensed financial-services solicitation. The available evidence does not independently verify the real-world operator identity, and the site does not present a specific regulatory license or registration number as a verified credential. A registration record names FUNDACAO INSTITUTO DE PESQUISAS ECONOMICAS - Fipe, which is supportive context but not conclusive proof of operational identity.

EVIDENCE

- The institutional navigation includes About Fipe, Quem Somos, Contact, Privacy Policy, Diretrizes, and Canal de Comunicação pages.
- The site's hosting infrastructure is served from AS13335, operated by CLOUDFLARENET - Cloudflare, Inc., US.
- The site's TLS certificate was issued by WE1 with DV validation and is valid to 2026-10-19 06:14:33 UTC.
- The page contains one newsletter/contact form and no sensitive form was identified.

What to Verify Next

Before credential or payment interactions, an independent check should confirm that the institutional contact details and organizational identity on the About and Contact pages correspond to official Fipe records or an independently sourced institutional channel. For paid courses, publications, or consulting engagements, the relevant enrollment, refund, invoicing, and payment-protection terms should be reviewed before funds are transferred. Any formal procurement or partnership should also be routed through independently confirmed institutional contacts rather than relying solely on contact details reached through the website.

EVIDENCE

- The About and Quem Somos pages provide the primary identity and institutional-description material for independent comparison.
- The Contact page and Canal de Comunicação page provide the site's stated contact routes for cross-checking.
- The education pages describe MBA, extension, EAD, capacitation, and in-company offerings that may involve paid enrollment or institutional contracting.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate institutional website. The principal residual limitation is that the real-world operator identity is not independently verified; this does not create a detected scam or impersonation concern.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, with all observed addresses belonging to Cloudflare edge servers and no origin candidate identified. This provides a meaningful mitigation against direct origin exposure and common network abuse, but remains a protective infrastructure signal rather than proof of legitimacy.

Closing Assessment

Normal browsing and ordinary site use are proportionate to the assessed posture; independent identity, commercial-terms, and payment-protection checks should be completed before submitting credentials or making payments.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fipec.org.br.

- The request stayed on fipec.org.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-11-10. CLEAR
- The earliest public archive of this site is from 2008-05-18. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fipe.org.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
