Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as "First Page Website Rentals," a commercial local lead-generation and SEO service for small businesses. It offers website-building, search-engine optimization, Google Analytics support, exclusive customer leads, and a claimed pay-per-lead arrangement under which customers pay only when a lead becomes a customer.

Scam/Impersonation Risk

Confirmed external contradiction indicators materially outweigh the site's otherwise conventional commercial presentation. External threat intelligence recorded 12 malicious detections and one suspicious detection, with Fortinet and Sophos among the flagging vendors, and the domain is listed by external blacklist sources. The homepage itself does not show a login form, credential-harvesting mechanism, crypto functionality, or direct brand-impersonation indicator, and no conflicting legal-entity names were observed; however, those page-level observations do not resolve the confirmed external detections. The five abuse reports associated

with the observed IP are specifically attributed to shared Cloudflare infrastructure, are whitelisted, and carry zero confidence, so they are not treated as evidence against this site individually. Evidence:

- The homepage describes SEO lead-generation services, “exclusive leads,” testimonials, and a pay-per-lead guarantee.
- External scanning recorded 12 malicious detections, one suspicious detection, and a confirmed blacklist status; Fortinet and Sophos were identified among the flagging vendors.
- Domain registration telemetry records creation on 2020-11-27, with an age of 5.73 years.
- Archive records show coverage from 2013-05-30 through 2025-07-10, spanning 13 years.

Regulatory Verification Notes

The site describes a standard marketing-services business rather than a regulated financial activity, but the available content does not identify a licensing authority or registration number. That is a disclosure and verification gap, not independent evidence of fraud. The site presents testimonials, a Wilmington, Delaware physical address, a telephone contact, and commercial performance claims, including “100% Guarantee” language and an assertion that businesses can reach the front page of Google; these claims require independent substantiation before commercial reliance. Independent identity verification remains incomplete. The transport layer is functioning, but the certificate is domain-validated rather than an organizational validation, which confirms encrypted transport—not the operator’s legal identity. Evidence:

- The homepage identifies “First Page Website Rentals” and presents the service model, testimonials, and commercial guarantee language.
- The site’s contact content provides a telephone number, contact email, and Wilmington, Delaware address.
- Hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-12.

What to Verify Next

Before any commercial engagement, the proposed contracting entity should be matched to independently verifiable corporate records and to a written agreement specifying lead ownership, exclusivity, payment triggers, refund rights, data handling, and performance obligations. The advertised guarantee and search-ranking claims should be tested against verifiable client references and documented service terms. The published business address and contact channels should be confirmed through an independent route, and any applicable local advertising, marketing, or data-protection obligations should be checked with the relevant authority. Evidence:

- The homepage makes a pay-per-lead guarantee that should be reconciled with binding written terms.
- The site presents testimonials and customer-growth claims that require independent reference checks.
- The contact content supplies business-location and communication details suitable for independent confirmation.

Summary Verdict

The available evidence supports a **critical trust posture** with elevated risk for sensitive interaction. The site’s ordinary service presentation does not offset the confirmed external threat and blacklist indicators, and the real-world operator remains unverified. Sensitive account, credential, payment, or business-data interaction is not supported by the current evidence.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure and resolves to an edge address on AS13335; no origin-server address was observed. This provides a meaningful layer of exposure mitigation, but shared CDN infrastructure cannot establish legitimacy or neutralize the external reputation findings.

Closing Assessment

The appropriate operational posture is restricted, non-sensitive browsing only; credentials, payments, and other consequential submissions should not be made unless the independent checks above produce satisfactory results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 5 reports on hosting IP 162.159.140.166 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of firstpagerentals.com.

- The request stayed on firstpagerentals.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by registrar-servers.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-27. NOTED
- The earliest public archive of this site is from 2013-05-30. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about firstpagerentals.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
