

Is firstplanettravels.com a scam? TrustSniffer's high-risk assessment: 0/100

firstplanettravels.com

Verdict

0

OUT OF 100

CRITICAL RISK

firstplanettravels.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for First Planet Travel Limited (Nigeria) describing travel and aviation-related services, with contact details and a contact form.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Welcome to First Planet Travel Limited

What firstplanettravels.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a corporate travel and aviation-services site for First Planet Travel Limited, presenting flight ticket sales, tours, cargo handling, aircraft management, charter arrangements, and VIP airport services. It describes itself as a Nigeria-incorporated company serving individuals, corporate organizations, and government entities, and claims to be the official ground service agent of Flynas.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional travel-services business and does not itself show phishing forms, wallet functionality, brand-impersonation indicators, or other overtly deceptive mechanics. However, this benign page presentation is outweighed by decisive external threat intelligence: the domain is reported as blacklisted, with 13 malicious detections and Tier-1 detections associated with Kaspersky and Sophos. The available evidence therefore supports a **critical sensitive-interaction risk posture**. No separate identity contradiction, phishing finding, or confirmed brand impersonation was identified; the concern is the external malicious and blacklist classification rather than the travel-service descriptions alone.

EVIDENCE

- External reputation telemetry records 13 malicious detections from 18 effective evaluations, with Kaspersky and Sophos among the flagged vendors.
- The domain is marked as blacklisted by both VirusTotal and an external blacklist source; Google Safe Browsing is recorded as not malicious.
- Homepage analysis identifies one contact form, no sensitive form, no hidden form, no wallet connection, and no suspected brand impersonation.
- Domain registration evidence records creation on 2022-11-15T15:40:49Z, an age of 3.76 years, and expiration on 2026-11-15T15:40:49Z.

Regulatory Verification Notes

The site presents First Planet Travel Limited as a Nigeria-incorporated travel and tourism company and describes services monetized through bookings, service fees, and corporate arrangements. The pages do not disclose a license authority or license number, leaving the regulatory basis for aviation, ticketing, cargo, charter, and airport-protocol services unresolved. This is a verification gap rather than, by itself, proof of fraud. The operator's real-world identity remains unverified, and the available page-authority signal is low; neither point establishes illegitimacy independently, but both limit reliance on the site's self-description. The valid transport encryption protects the connection but does not authenticate the operator or override the external threat findings.

EVIDENCE

- Homepage content identifies "First Planet Travel Limited," states that it is incorporated in Nigeria, and claims 15+ years of experience, 50+ team members, and 100+ global destinations.
- The site claims to be the official ground service agent of Flynas; that affiliation is presented on the homepage and is not independently established by the supplied evidence.
- WHOIS records OwnRegistrar, Inc. as registrar; the domain was created on 2022-11-15T15:40:49Z and expires on 2026-11-15T15:40:49Z.
- Hosting is on AS47583 (AS-HOSTINGER - Hostinger International Limited, CY); the TLS certificate is issued by YE1, uses DV validation, and is valid to 2026-11-10T03:32:52+00:00.

What to Verify Next

Before any transaction or sensitive interaction, an independent check should confirm First Planet Travel Limited's corporate existence in the relevant Nigerian registry and establish whether the specific ticketing, cargo, charter, and airport services require authorizations that the operator holds. The claimed Flynas relationship should be confirmed through Flynas using contact details obtained independently of the website. Any booking should use a payment method with dispute and chargeback protections, with written confirmation of the contracting entity, refund terms, itinerary, and applicable service conditions. Credentials should not be reused on this site, and the site should not be granted access to sensitive account or payment information while the external threat classification remains unresolved.

EVIDENCE

- The homepage provides the legal name, business description, and Flynas agency claim that require independent confirmation.
- The site contains a contact page and contact form but no supplied evidence of an independently verified corporate or regulatory channel.
- The site's transport security is DV-only TLS, which verifies encrypted delivery rather than organizational identity.

Summary Verdict

The overall posture is **critical risk**, with the site's apparent business presentation insufficient to offset the confirmed external malicious and blacklist signals. The operator's identity and regulatory standing are not independently verified, so the website should not be treated as a trusted channel for sensitive interaction.

Infrastructure Integrity

The site resolves directly to four likely origin addresses, with no CDN detected and no edge-IP layer identified. This provides limited infrastructure-level mitigation against direct origin exposure; the hosting environment is a supporting technical fact, not evidence of legitimacy.

Closing Assessment

Restrict activity to non-sensitive observation until the external detections, operator identity, claimed commercial affiliation, and applicable authorizations have been independently resolved; credentials, payments, and confidential information should not be submitted.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of firstplanettravels.com.

- The request stayed on firstplanettravels.com. It was not redirected to another domain. CLEAR
- Registration is published under OwnRegistrar, Inc.. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-15. NOTED
- The earliest public archive of this site is from 2023-10-04. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about firstplanettravels.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
