

Is fivepost.ru legit? TrustSniffer's high-trust assessment: 100/100

fivepost.ru

Verdict

100

OUT OF 100

HIGH TRUST

fivepost.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-style homepage for 5Post, a Russian logistics provider associated with pickup points and parcel lockers in Pyaterochka and Perekrestok stores. It offers shipment tracking, delivery-price calculation, parcel dispatch, business integration, freight, fulfillment, partner information, support contacts, and legal documentation.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the official-style online service presence of 5Post, a Russian logistics provider offering parcel dispatch, shipment tracking, delivery-price calculation, pickup through Pyaterochka and Perekrestok stores, courier delivery, freight transport, fulfillment, and commercial logistics integration for individuals and businesses.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other fraud indicators were observed. The homepage presents a coherent logistics business model, while its interactive functions align with that purpose and do not expose an anomalous credential-capture flow. External threat-reputation checks were also clean, supporting the conclusion that this is a legitimate and established service rather than a deceptive imitation.

- The homepage's two detected forms perform shipment tracking and delivery-cost calculation; neither was classified as sensitive or directed to an untrusted destination.
- Homepage behavior showed no hidden forms, external password forms, cloaking, clipboard hijacking, wallet interaction, or suspicious inline scripts.
- Reputation telemetry recorded zero malicious and zero suspicious detections, no malicious safe-browsing finding, no reported abuse, and no signature matches.
- The domain holds an established global traffic position at rank 48,484.

Regulatory Verification Notes

The homepage provides company, contact, support, and legal-document navigation, presenting an appropriate disclosure framework for a corporate logistics service. The supplied evidence does not establish the contents of a particular operating licence or registration claim; this is a minor due-diligence consideration rather than evidence of misconduct, especially because the business presented is logistics rather than a financial or investment service. No adverse broker-profile match was identified, although that contextual result is not a legal or regulatory determination.

- The homepage navigation identifies dedicated "About the company," contacts, support, and legal-document resources.
- The homepage describes published service terms and tariffs as the commercial basis for consumer and business shipping services.
- Third-party broker-context data produced no matched profile for the site.

What to Verify Next

Enterprise onboarding should confirm the contracting entity named in the applicable legal documents, reconcile payment instructions with the executed agreement, and review service terms, liability limits, tariffs, and data-handling provisions for the intended shipping workflow. Official contact channels should be confirmed independently before establishing a high-value commercial relationship.

- The homepage offers separate service paths for private customers, small businesses, and medium-to-large businesses, making the applicable contractual route material to onboarding.
- The delivery calculator states that displayed prices and delivery periods are preliminary and finalized during order processing.
- The site advertises mass-dispatch functionality and business integration, supporting review of operational and data-processing terms before enterprise deployment.

Summary Verdict

The website presents a legitimate, established, and trustworthy corporate logistics operation, with strong convergence between its identity, service content, functional behavior, traffic footprint, and clean external reputation. No contradictory risk signals were identified. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to corporate hosting associated with Perekrestok-2000 LLC rather than operating behind a detected CDN or WAF. Its origin is therefore directly visible, but the identified corporate network, stable availability, and valid transport encryption provide a sound infrastructure posture; these controls mitigate technical risk without independently proving business legitimacy.

- The hosting infrastructure serves the site from AS44704, operated as “X5-RETAIL-GROUP-AS - Perekrestok-2000 LLC, RU,” at the directly resolved Russian address.
- The site’s TLS certificate was issued by HARICA DV TLS RSA with domain validation and is valid to 2027-02-06.

Closing Assessment

Prospective users may proceed with ordinary consumer and account activity, while institutional engagements should follow standard vendor onboarding and contractual controls proportionate to the value and operational importance of the relationship.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fivepost.ru.

- The request stayed on fivepost.ru. It was not redirected to another domain. CLEAR
- It is hosted on X5-RETAIL-GROUP-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fivepost.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
