Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Flights.idealos.com is a free flight-price comparison service that searches airline and online travel-agency offers, presents route and destination examples, and directs visitors toward booking options. Its apparent model is referral or partner revenue supplemented by online advertising rather than deposits or direct financial investment.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent travel-comparison function, with no phishing, impersonation, malicious-content, hidden-form, wallet, or credential-capture indicators. The site's long operational history and consistent archival presence further support an established identity rather than a recently created or repurposed operation.

- The domain was registered in 2000 and is approximately 26.17 years old.
- The site has 962 archive snapshots spanning 2008–2026, covering 19 tracked years.

Regulatory Verification Notes

The site does not claim a financial or regulatory license, which is consistent with its apparent travel-marketplace function; the relevant verification point is therefore the transparency of booking, partner, and consumer terms rather than financial authorization. Registration privacy is an administrative detail, while the identified corporate organization and clean external reputation support the site's established status.

- Domain registration is through Gandi SAS, with the organization recorded as Idealo Internet GmbH.
- The site is served from AS208681 (IDEALO-AS - Idealo Internet GmbH, DE).
- TLS is issued by Amazon RSA 2048 M01 at DV validation level and is valid through 2026-11-05.

What to Verify Next

Before completing a purchase, the selected airline or agency should be checked as the final contracting party, with attention to fare conditions, cancellation terms, and refund responsibility. Any applicable consumer-facing disclosures and official support channels should also be confirmed through the relevant provider.

- The homepage contains one flight-search form and no sensitive credential or payment form.
- Observed interaction testing found no hidden forms, external password forms, clipboard interception, or wallet-connection activity.

Summary Verdict

The site presents a high-confidence, established, and legitimate trust posture. Its identity, operating history, content, behavior, and reputation converge without evidence of scam, impersonation, phishing, or conflicting legal identities. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site is protected by a CDN/WAF, with observed edge servers including 13.248.169.48, 51.38.154.47, and 76.223.54.146; infrastructure analysis also identified potential origin candidates. This protective architecture mitigates direct exposure but is appropriately treated as a supporting control rather than proof of legitimacy.

Closing Assessment

Prospective users can use the service normally and should confirm the final booking terms and responsible provider before purchase.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of flights.idealocal.com.

- The request stayed on flights.idealocal.com. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by awsdns-24.org, across 4 name servers. NOTED
- The registration is paid up to 2027-06-08. NOTED
- The earliest public archive of this site is from 2008-05-09. CLEAR
- It is hosted on IDEALO-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about flights.idealocal.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
