The page as captured

<https://focovix.com.br/>

What focovix.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Focovix Seguros is a corporate insurance-brokerage website presenting vehicle, life, property, liability, consórcio, pension, and other insurance-related products, with company information, service descriptions, customer-contact channels, and a contact form intended to generate insurance advisory and policy-placement business.

Scam/Impersonation Risk

A confirmed external blacklist contradiction materially outweighs the site's otherwise conventional corporate presentation. External scanning also recorded malicious and suspicious detections. The page content itself does not show a detected brand-impersonation or phishing pattern, and the business model is consistent with an insurance broker, but those positive observations do not resolve the external threat signal. Browser analysis additionally identified suspicious inline scripting and non-whitelisted outbound posting activity, which warrants caution around any interaction that transmits information. No conflicting legal-entity names were observed across the available identity material.

EVIDENCE

- The homepage presents “Focovix Seguros” as an insurance brokerage and contains no login form, hidden form, wallet connection, or other direct credential-collection mechanism.
- The site’s observed browser behavior included 6 suspicious inline scripts, 10 external XHR requests, 8 external POST requests, and 2 non-whitelisted external POSTs.
- External reputation assessment recorded `external\_blacklist: true`, with 1 malicious and 1 suspicious detection; no Google Safe Browsing malicious result was recorded.
- Domain registration continuity is recorded from 2020-06-15, with the domain approximately 6.19 years old; archival coverage is recorded from 2021-01-01 to 2025-03-21, spanning 5 years tracked.

Regulatory Verification Notes

The site presents a broad insurance-brokerage offering and includes “Sobre nós,” social and environmental commitment material, privacy/LGPD information, frequently asked questions, and contact content. However, the available pages do not state a licensing authority or registration number, and licensing is not independently verified in the supplied evidence. This is a regulatory-disclosure gap rather than a standalone finding of fraud. The apparent connection between the site and the named Focovix insurance business is plausible but remains unverified as an independently established operator identity. The site’s low page-authority signal and limited structured metadata provide little additional independent corroboration.

EVIDENCE

- The homepage navigation identifies insurance categories including vehicles, people, property, guarantees, consórcios, and related services.
- The available business analysis records `license\_claimed: false`, with no license authority or license number supplied.
- The site’s transport encryption uses a DV certificate issued by YR2, valid through 2026-11-04T12:24:25+00:00.
- Hosting is on AS31898, ORACLE-BMC-31898 - Oracle Corporation, US.

What to Verify Next

Before any sensitive engagement, an institution should confirm Focovix’s legal and insurance-broker status directly with the relevant Brazilian registry and independently confirm that any insurer or financial-product partner named during a quotation is genuine and authorized. Contact details should be validated through an independently sourced corporate record or offline channel rather than relying solely on the website. Any request for credentials, identity documents, payment information, or policy funds should be preceded by confirmation of the exact contracting entity, policy issuer, payment beneficiary, and applicable cancellation or claims process.

EVIDENCE

- The contact page and homepage provide the site's stated customer-contact routes and a single contact form.
- The site links to WhatsApp, Instagram, Facebook, and LinkedIn, providing channels that can be cross-checked against independently sourced corporate profiles.
- The legal-content menu includes "Políticas de Privacidade e LGPD," but the supplied evidence does not establish licensing or regulatory registration.

Summary Verdict

The website has a plausible insurance-brokerage presentation and an apparently consistent business identity, but its overall posture is low trust because a confirmed external blacklist contradiction is present and sensitive interaction risk is elevated. The available evidence supports passive review only until the operator, regulatory standing, and transaction counterparties are independently established.

Infrastructure Integrity

The site resolves through a direct hosting arrangement with one observed IP, with no detected CDN or edge-IP layer and no candidate origin set identified. A valid DV TLS certificate and stable HTTP service provide basic transport and availability controls, but these infrastructure characteristics do not establish legitimacy or offset the reputation concern.

EVIDENCE

- The resolved infrastructure reports 1 unique IP, 0 edge IPs, no detected CDN, and 0 candidate origin IPs.
- The site's observed transport certificate is DV-validated and issued by YR2.

Closing Assessment

The proportionate action is to keep activity to passive viewing while independent identity, regulatory, and transaction checks are completed; sensitive submissions and financial engagement should remain deferred until those checks are satisfactory.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

Identity verification

Status	LIKELY
--------	--------

About this assessment

A trust score summarises the evidence TrustSniffer could collect about focovix.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
