

Is fondazionetelethon.it legit? TrustSniffer's high-trust assessment: 100/100

fondazionetelethon.it

Verdict

100

OUT OF 100

HIGH TRUST

fondazionetelethon.it appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Italian Fondazione Telethon page describing its established rare-disease research mission and offering a three-step form for one-time or recurring donations through credit card, PayPal, Satispay, or bank debit. The page provides extensive institutional context, program metrics, news, privacy information, legal registration, physical addresses, and contact details.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official online presence of Fondazione Telethon ETS, an Italian charitable foundation that presents its rare-genetic-disease research mission, funded programs, institutional information, and facilities for public donations and related charitable giving.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or malicious reputation findings were observed. The donation journey supports one-time and recurring contributions through credit card, PayPal, Satispay, or bank debit; these are conventional fundraising methods and the payment forms showed no untrusted destination, hidden fields, or external password collection. The domain's long-established registration, consistent registrant identity, substantial archive record, and clean threat-intelligence profile converge strongly against a scam or impersonation interpretation.

- Domain-registration records identify Fondazione Telethon as both owner and organization; registered 2017-03-23 (~9.36 years old) through Retelit Digital Services S.p.A., with expiration on 2027-03-23.
- The web archive contains 244 snapshots spanning 2025–2026 (2 years tracked); the limited period reflects incomplete archival coverage rather than the domain's age, and no suspicious repurposing or semantic drift was detected.
- The homepage's donation forms have trusted destinations, with no login form, hidden form, wallet-connect behavior, clipboard hijacking, cloaking, or suspicious inline scripts detected.
- External reputation checks recorded no malicious or suspicious classifications, no phishing finding, no abuse reports, and no signature matches.

Regulatory Verification Notes

The homepage presents a coherent legal identity as Fondazione Telethon ETS and provides institutional history, mission information, physical addresses, registry details, financial-reporting links, a code of ethics, and governance documentation. No financial-services license is claimed, but the disclosed activity is charitable fundraising rather than regulated brokerage or investment activity; the absence of such a claim therefore does not create a scam inference. The site also provides privacy information and consent controls covering cookies, personalized advertising, precise geolocation, and device-related processing.

- The foundation and institutional pages identify the organization, describe its research and patient-support activities, and expose legal-registration, financial-reporting, governance, address, and contact information.
- The site is served from AS5394 (Unidata – UNIDATA S.p.A., Italy).

- The site's transport encryption uses a TLS certificate issued by GEANT TLS RSA 1 (DV), valid to 2027-02-06.
- The homepage's consent interface discloses processing purposes and provides options to accept, reject, or modify consent.

What to Verify Next

For material donations, the beneficiary name displayed by the selected payment provider or bank should be matched to Fondazione Telethon ETS before authorization. Institutional due diligence may also confirm that the latest financial statements, governance documents, and registry particulars remain current, while privacy-conscious users can review and adjust the available consent settings before interacting with optional personalization functions.

- The donation page uses a multi-step payment form, making beneficiary confirmation at the provider's authorization stage a practical control.
- The institutional navigation exposes financial statements, governance materials, official positions, and organizational information suitable for documentary review.
- The consent interface permits rejection or modification of optional data-processing choices.

Summary Verdict

The website is legitimate, established, and trustworthy, with a coherent institutional identity and no contradictory risk signals. The evidence supports normal interaction, including account login where offered, donations, and standard site use.

Infrastructure Integrity

The site resolves to a single Italian hosting address operated by Unidata, with the likely origin directly visible and no CDN or WAF detected. This is a conventional, identifiable hosting posture; its stable resolution and valid encrypted transport are mitigating operational signals, although infrastructure alone is not proof of legitimacy.

Closing Assessment

Prospective users may engage normally, applying standard payment hygiene and confirming transaction details before authorizing material donations.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fondazionetelethon.it.

- The request stayed on fondazionetelethon.it. It was not redirected to another domain. CLEAR
- Registration is published under Retelit Digital Services s.p.a.. CLEAR
- DNS for this domain is served by azure-dns.com. NOTED
- The registration is paid up to 2027-03-23. NOTED
- The earliest public archive of this site is from 2025-02-20. CLEAR
- It is hosted on Unidata, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fondazionetelethon.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
