

Is forexfactory.com legit? TrustSniffer's high-trust assessment: 90/100

forexfactory.com

Verdict

90

OUT OF 100

HIGH TRUST

forexfactory.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Forum-driven forex market site providing news, economic calendar, broker guides and community discussion. Contains a standard login form for account access and community participation.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Forex Factory is an established-looking forex market information and community platform presenting trading forums, market news, an economic calendar, broker guides, live spreads, market instruments, and account-based community features; its apparent model is an informational portal supported by advertising, broker referrals, and premium functionality.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent financial-information and community service rather than a deceptive investment offer, and the available analysis found no phishing, brand-impersonation, malicious-content, or other direct fraud indicators. The site's long operating history, continuous archival presence, strong public traffic footprint, and clean external reputation are mutually reinforcing signs of an established website, although they do not independently verify the real-world operator identity.

EVIDENCE

- The homepage is classified as a forum and community page covering forex trading, market news, broker activity, and economic-calendar content; no red flags or impersonation indicators were identified.
- The domain was registered in 2004 and is approximately 22.48 years old.
- The web archive records 5,000 snapshots spanning 2004–2024, with 21 years tracked.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit; the site has a traffic rank of 5652.

Regulatory Verification Notes

The site appears to operate primarily as an informational and community service rather than as a regulated financial-services provider. The available site material does not establish a licensing authority or license number, so any regulatory status associated with broker referrals or financial information remains a verification matter rather than evidence of misconduct. The operator's real-world identity is not independently verified, and the high-trust assessment should therefore be understood as evidence-consistent legitimacy, not proof of corporate ownership or affiliation. No adverse broker-reputation match was identified in the supplied third-party context.

EVIDENCE

- The site's stated business model is an established informational forum and market-news portal monetized through advertising, affiliate or broker referrals, and premium features; no license claim or license number is recorded.
- The domain is registered through Network Solutions, LLC, with registration continuing to 2028-02-21T06:15:42Z.
- Hosting is on AS13335 through CLOUDFLARENET - Cloudflare, Inc., US.
- TLS uses issuer WE1 with DV validation and is valid to 2026-10-24T14:06:16+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal entity operating any commercial or referral activity, review the applicable terms and privacy disclosures, and establish which party is responsible for any transaction. Any broker or financial-service referral should be checked against the relevant regulator's current registry, while payment activity should use protections appropriate to the transaction and the applicable return or dispute process. Account access should be limited to credentials that are unique to this service and managed through the organization's normal password controls.

EVIDENCE

- The homepage provides account creation and login functions, creating a direct credential-handling decision point.
- The available disclosure state is unclear regarding licensing and regulated-service responsibility.
- The site presents broker-related guides and activity information, making independent confirmation of any referred provider's regulatory status appropriate.

Summary Verdict

Available evidence supports a high-trust, low-risk posture consistent with an established, apparently legitimate website. The assessment is well grounded in converging historical, technical, content, traffic, and reputation signals, while the operator's identity remains independently unverified.

Infrastructure Integrity

The website is fronted by Cloudflare CDN/WAF infrastructure, with observed CDN edge servers and potential origin candidates. This architecture is a useful exposure-mitigation measure and supports service resilience, but protective infrastructure alone is not proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, provided that independent merchant-identity, applicable terms, and payment-protection checks are completed before credentials or funds are committed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of forexfactory.com.

- The request stayed on forexfactory.com. It was not redirected to another domain. CLEAR
- Registration is published under Network Solutions, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-02-21. CLEAR
- The earliest public archive of this site is from 2004-03-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about forexfactory.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
