

Is form-mailer.jp legit? TrustSniffer's high-trust assessment: 90/100

form-mailer.jp

Verdict

90

OUT OF 100

HIGH TRUST

form-mailer.jp appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Marketing/product page for FormMailer, a Japanese form and landing-page SaaS. Describes features, integrations, pricing tiers (free and paid), security controls, and recent updates/announcements. Appears to be an established commercial service.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

FormMailer is a Japanese commercial SaaS platform for creating hosted web forms and landing pages, presented as a service for business, institutional, marketing, event, customer-service, and internal-workflow use.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, malicious-content, or blacklist indicators. The site's historical continuity and externally observed reputation are consistent with an established service rather than a recently created or repurposed operation. Browser testing did record external requests, external posts, and substantial DOM changes, but it found no cloaking, hidden forms, externally submitted password forms, wallet activity, clipboard manipulation, or other high-risk abuse pattern; these observations are compatible with a feature-rich SaaS site using ordinary integrations. The website's apparent legitimacy is therefore evidence-consistent, while the real-world operator identity remains independently unverified. Evidence:

- Domain continuity is 17.97 years; archival coverage contains 611 snapshots from 2008-08-22 through 2026-08-05, spanning 19 years with a maximum recorded gap of 1 year.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; the domain is ranked 37433 and is within the top 1,000,000 sites.
- Browser testing completed 2 successful runs and observed 31 external XHR requests, 20 external posts, and a maximum DOM difference of 1266, while recording 0 hidden forms, 0 external password forms, 0 wallet-connect runs, and 0 clipboard-write events.

Regulatory Verification Notes

The homepage presents a conventional hosted software model: form creation, landing-page construction, file upload, response management, PayPal payment integration, Webhook and kintone connectivity, and free and paid subscription tiers. It also describes security features including two-factor authentication, account activity history, and administrator IP-address restrictions. No regulated-finance licensing claim or license number is presented in the captured product content; for this apparent SaaS business, that is a transparency item for ordinary commercial due diligence, not evidence of a scam. The available evidence does not independently verify the legal entity operating the service. A separate broker-reputation dataset produced no match, which is contextual only and is not a licensing determination. Evidence:

- Hosting infrastructure: AS23824, FUTURE - Future Spirits Co.,Ltd., JP.
- TLS: GlobalSign GCC R6 AlphaSSL CA 2025, DV validation, valid to 2027-01-23.

- The homepage describes free and paid plans, PayPal integration, Webhook and kintone connectivity, and security controls including two-factor authentication and IP restrictions.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the merchant's legal identity, applicable subscription terms, cancellation and refund conditions, and the payment-protection arrangements associated with any paid plan. Official support and account-recovery channels should be confirmed through an independent route rather than relying solely on links encountered during an initial visit. Evidence:

- The homepage exposes distinct login and registration pathways, making account-ownership and recovery procedures relevant to pre-use checks.
- The homepage promotes a hosted subscription service with payment-related functionality, making payment terms and protection conditions material to commercial due diligence.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website and supports normal browsing and ordinary service consideration. The principal residual uncertainty concerns independent confirmation of the real-world operator, rather than any observed scam or impersonation contradiction.

Infrastructure Integrity

Resolution identifies a direct hosting posture with one origin candidate and no detected CDN edge layer; no named WAF vendor is present in the supplied infrastructure record. This is a neutral technical characteristic and should not be treated as proof of legitimacy or as evidence of maliciousness.

Closing Assessment

Normal evaluation is proportionate, with independent merchant-identity, subscription-term, and payment-protection checks completed before credentials or payment details are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of form-mailer.jp.

- The request stayed on form-mailer.jp. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2008-08-22. CLEAR
- It is hosted on FUTURE, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about form-mailer.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
