

Is fotomac.com.tr legit? TrustSniffer's high-trust assessment: 100/100

fotomac.com.tr

Verdict

100

OUT OF 100

HIGH TRUST

fotomac.com.tr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Fotomaç sports news page (Turkish) with extensive cookie/consent information and many third-party advertising/analytics integrations. Editorial content about transfers and sports; monetized via ads.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Fotomaç is an established Turkish sports-news and media website presenting breaking transfer news, sports coverage, and editorial content through an advertising-supported model that uses display advertising, third-party analytics, and cookie-based personalization.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent news-and-media purpose, contains no login or sensitive transaction form, and shows no indicators of phishing, brand impersonation, malicious behavior, or deceptive redirection. External reputation checks were clean, and the available evidence is consistent with a legitimate, low-risk content site. The real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage is categorized as “News / Media” and “News / Blog,” with sports news and transfer coverage as its principal subjects.
- The homepage contains no login form, sensitive form, hidden form, or untrusted form destination.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing result.
- The domain was registered in 1999 and is approximately 27.53 years old.

Regulatory Verification Notes

The site’s apparent business model is editorial publishing funded by advertising, rather than the provision of a financial product or regulated investment service. Its consent material explains the use of necessary, personalization, advertising, and third-party cookies, but the supplied page content does not independently establish the operating legal entity or any applicable corporate registration. This is a transparency point for identity verification, not evidence of scam activity. No third-party regulated-entity status was established in the supplied evidence.

EVIDENCE

- The homepage’s consent material states that cookies are used for advertising, marketing, personalization, and service functionality, with user preference controls.
- The reviewed site content makes no financial-license or regulated-service claim.
- The hosting infrastructure is served from AS16509, Amazon.com, Inc. (Amazon-02), US.
- The site uses a Domain Validated TLS certificate issued by Go Daddy Secure Certificate Authority - G2, valid to 2026-11-06T12:41:36+00:00.

What to Verify Next

Before credential or payment interactions, an independent check should connect the website to the relevant legal entity using official corporate, contact, or publisher information rather than relying solely on the site’s own presentation. Cookie and advertising preferences should be reviewed according to the intended privacy posture, and any commercial transaction should be assessed through ordinary merchant-identity, return-policy, and payment-protection checks.

EVIDENCE

- The homepage provides links associated with LinkedIn, Twitter/X, and Yandex, which can be compared with independently established organizational profiles.
- The homepage includes a dedicated consent and advertising-preference interface that can be reviewed before accepting optional processing.
- The site presents an editorial publishing function rather than an account-based financial or transactional workflow.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated media purpose. The classification is strong, while independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The website is protected by Amazon CloudFront CDN/WAF infrastructure, with observed addresses limited to CDN edge servers and no origin candidate identified. This reduces direct exposure of the origin environment and is a mitigating infrastructure signal, but it is not proof of operator legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before submitting credentials or making payments, standard independent checks of the merchant or operating entity, applicable policies, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fotomac.com.tr.

- The request stayed on fotomac.com.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-44.org. NOTED
- The registration is paid up to 2027-02-11. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fotomac.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
