- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently presents only a Cloudflare access-restriction page for foundrysourcings.co.uk, stating that the visitor has been blocked and must enable cookies or contact the site owner; no business description, service offering, or transactional purpose is available to assess.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External security intelligence identified the domain as malicious and blacklisted, with multiple malicious and suspicious detections, including tier-one security-provider detections. These signals constitute a direct contradiction to the limited benign content visible on the access page. The page itself does not display phishing forms, impersonation content, or transactional mechanisms, but the block prevents examination of the underlying site and does not offset the external threat findings. No identity contradiction was observed because no competing legal-entity names were exposed.

EVIDENCE

- External security evaluation recorded 13 malicious detections and 2 suspicious detections for the domain, with a confirmed blacklist result.
- The homepage returned a Cloudflare “Attention Required” block rather than identifiable business or operator content.
- The domain was registered in 2026 and is approximately 0.09 years old, according to registration records.

Regulatory Verification Notes

The accessible page does not expose legal, corporate, licensing, ownership, terms, or service information, so the operator's real-world identity remains unverified and the site's regulatory status cannot be established. This is a material verification gap for any service that might involve payments, credentials, investment, brokerage, or other regulated activity; it should not be treated as proof of illegality by itself. No matching broker-reputation record was identified in the available third-party context.

EVIDENCE

- The homepage contains only an access restriction notice and no legal or licensing disclosure.
- The page provides no terms, privacy, company-information, or regulatory pages for review.
- The registrar recorded for the domain is Namecheap, Inc.

What to Verify Next

Before any sensitive interaction, an independent party should identify the operating entity through an official corporate registry and confirm any claimed licence directly with the applicable regulator. Contact details and ownership claims should be validated through an independently sourced channel rather than through the blocked site. No credentials, payment details, financial information, or account access should be submitted unless those checks establish a legitimate operator and an appropriate legal basis for the service.

EVIDENCE

- The homepage exposes no login form, payment form, wallet connection, or other transactional flow.
- The accessible page provides no business model, operator identity, or licensing claim.
- The site's access challenge prevents inspection of the underlying pages and service mechanics.

Summary Verdict

The available evidence supports a critical-risk posture with the site's legitimacy and operator identity unverified. The external malicious and blacklist signals outweigh the limited benign indicators associated with the access-control page, making the website unsuitable for sensitive interaction absent independent resolution of its identity and security status.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses are CDN edge addresses rather than an independently visible origin. This provides an infrastructure-level exposure-control

measure but is not evidence that the operator or underlying content is legitimate.

EVIDENCE

- Hosted through AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- Observed edge addresses: 104.21.32.67, 172.67.184.65, 2606:4700:3032::6815:2043, and 2606:4700:3037::ac43:b841.
- TLS certificate issued by WE1 using DV validation, valid to 2026-12-01T22:19:49+00:00.

Closing Assessment

The appropriate disposition is to suspend login, credential, payment, and other financially sensitive activity until independent identity, regulatory, and security checks produce clear, documented results.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

About this assessment

A trust score summarises the evidence TrustSniffer could collect about foundrysourcings.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
