Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	15 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	4.8 years old Registered history	CLEAR
Web archive	Archived since 2024 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

The page as captured

chrome-error://chromewebdata/

What fourcornersandagallery.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at fourcornersandagallery.com is an online domain whose specific business purpose, operator identity, and substantive services cannot be established from the supplied site evidence. Its available identity signals are therefore insufficient to support engagement involving accounts, credentials, payments, or other sensitive activity.

Scam/Impersonation Risk

The site presents a **confirmed external reputation threat** rather than merely an unresolved identity question. It is blacklisted by two external sources, with 15 malicious and one suspicious detection recorded in a broader security assessment; this is the decisive contradiction supporting a critical-risk posture. No conflicting legal-entity names or confirmed brand-impersonation finding were recorded, so the concern is external threat reputation rather than an established identity contradiction. The available archive record does not indicate suspicious repurposing or semantic category drift, but that limited positive context does not offset the confirmed blacklist status.

EVIDENCE

- External reputation assessment recorded 15 malicious detections and 1 suspicious detection for the domain, including tier-one security-vendor detections.
- The domain is recorded as blacklisted by two external sources; a separate Google Safe Browsing result was negative.
- Historical coverage spans 2024-02-29 to 2025-07-11, representing 2 years tracked, with no suspicious repurposing or semantic drift identified.

Regulatory Verification Notes

The real-world operator identity is not independently verified, and the available evidence does not establish a licensing or registration basis for any regulated activity. This is a material transparency gap for a site that may solicit sensitive interactions, although the private registration arrangement is an administrative limitation rather than proof of deception. No matching broker-reputation record was identified in the available third-party contextual source; that result is not a licensing or regulatory determination.

EVIDENCE

- The domain registration record shows registration through GoDaddy.com, LLC on 2021-11-18, with an age of 4.76 years.
- The site's TLS certificate is Domain Validated, issued by YR1, and valid to 2026-09-30.
- No licensing number, regulator, or independently verified legal-entity disclosure is established in the supplied site evidence.

What to Verify Next

Sensitive interaction should be suspended unless the domain's status is independently cleared by the relevant security, domain-registration, and regulatory functions. Any claimed operator should be matched to an independently sourced corporate identity, and any claimed financial or regulated service should be checked against the applicable official register before credentials, payments, or personal information are considered. Official contact channels should also be confirmed through an independent, offline route.

EVIDENCE

- The external blacklist status requires independent technical clearance before account or payment activity.
- Operator identity remains unverified in the available evidence.
- Licensing and registration disclosures are not established for independent regulatory confirmation.

Summary Verdict

The overall posture is **critical risk**, with the available evidence unsuitable for normal sensitive engagement. The site cannot presently be treated as a trustworthy destination for authentication, financial activity, or submission of confidential information.

Infrastructure Integrity

The domain resolves directly through GoDaddy infrastructure, with no CDN detected and a likely origin address exposed; this provides ordinary hosting stability but no meaningful assurance of legitimacy. Protective infrastructure cannot offset the external reputation risk in this case.

EVIDENCE

- Hosted on AS398101 operated by GO-DADDY-COM-LLC — GoDaddy.com, LLC, US.
- The technical assessment recorded 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- The resolved hosting country is the US, with ARIN identified as the registry.

Closing Assessment

The proportionate decision is to avoid login, credential submission, financial transactions, and other sensitive interaction with the site pending independent security, operator-identity, and regulatory clearance.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNKNOWN
Identity score	50/100
Identity verification confidence	15%

- AI page analysis unavailable (page captured; identity not AI-verified)

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fourcornersandagallery.com.

- The request for fourcornersandagallery.com ended on chromewebdata, a different domain. WATCH
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-11-18. CLEAR
- The earliest public archive of this site is from 2024-02-29. CLEAR
- It is hosted on GO-DADDY-COM-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fourcornersandagallery.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
