

Is foxfab.com legit? TrustSniffer's high-trust assessment: 98/100

foxfab.com

Verdict

98

OUT OF 100

HIGH TRUST

foxfab.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate website for Foxfab Power Solutions offering custom electrical enclosures, transfer switches and generator connection products, highlighting certifications (ETL, IBC), product categories, and contact options for engineering support.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What foxfab.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1997.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Foxfab is a corporate B2B website for Foxfab Power Solutions, presenting custom electrical enclosures, transfer switches, generator cabinets, load-bank solutions, and related power-distribution hardware for commercial and industrial customers. Its apparent business model is product sales supported by custom engineering, prototyping, production, delivery, representatives, and engineering-support contact options.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, malicious-content, or confirmed blacklist finding. The site's content is consistent with an industrial manufacturer rather than a deceptive financial or consumer-service operation. Two abuse reports were associated with a shared Webflow content-delivery IP, not specifically with Foxfab; the attribution carries zero confidence and was discounted because the reports apply to shared infrastructure. This is a limited reputational signal, not evidence of site-level abuse.

EVIDENCE

- The homepage presents a coherent corporate/product model covering electrical enclosures, transfer switches, generator cabinets, load-bank solutions, and engineering support, with no reported red flags.
- The domain was registered on 2007-02-15 and is approximately 19.52 years old.
- The external reputation findings recorded 0 malicious results, 0 suspicious results, and no blacklist or phishing match; the two reported IP events were attributed to shared Webflow infrastructure with confidence 0.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate industrial supplier, but the real-world operator identity is not independently verified. The homepage states that products are ETL Listed to UL1008 Standards and that many models have IBC Seismic Certification; these are substantive product-compliance claims, although the analysis does not independently validate the listings. The site does not present itself as a financial or otherwise regulated investment service, so licensing is not the central risk issue; confirmation of the company behind the site and of the stated product certifications remains appropriate before procurement or contractual reliance. Registration privacy is an administrative limitation rather than an indication of deceptive conduct.

EVIDENCE

- The homepage identifies Foxfab Power Solutions and describes support from initial concept and prototyping through production and delivery.
- The homepage states that products are ETL Listed to UL1008 Standards and that many models are available with IBC Seismic Certification.
- Hosting telemetry identifies AS209242, CLOUDFLARESPECTRUM — Cloudflare London, LLC, US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-14T16:18:07+00:00.

What to Verify Next

Before credential or payment interactions, an independent check should connect Foxfab Power Solutions with a current corporate registration, operating address, and authorized commercial contacts. Procurement teams should confirm the ETL and IBC claims against the relevant certification records, obtain applicable product documentation, and validate quotations, payment instructions, warranties, and return or remedy terms through independently sourced contact channels. Any account access should use a unique password and normal organizational payment controls.

EVIDENCE

- The homepage provides product, representative, and engineering-support pathways that can be compared with independently sourced business records.
- The product pages and resources area provide the appropriate locations for checking model documentation and certification references.
- The absence of sensitive forms and login forms in the observed site interaction limits the immediate credential-collection surface.

Summary Verdict

The overall posture is high trust and low risk, with strong convergence between the site's coherent industrial-business content, long operating history, clean threat findings, stable technical presentation, and established protective infrastructure. The evidence supports normal website interaction in context, while the operator's real-world identity remains not independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with the observed address belonging to an edge server and no origin candidate identified. This reduces direct origin exposure and is a mitigating control, but infrastructure protection alone does not establish the operator's identity or product claims.

Closing Assessment

Standard browsing is proportionate to the assessed posture; before credentials, payments, or binding procurement commitments, normal independent merchant-identity, documentation, return-policy, and payment-protection checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 2620:cb:2000::1 (Webflow, Inc, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of foxfab.com.

- The request stayed on foxfab.com. It was not redirected to another domain. CLEAR
- Registration is published under 1API GmbH. CLEAR
- DNS for this domain is served by monikerdns.net, across 4 name servers. NOTED
- The registration is paid up to 2027-02-15. NOTED
- The earliest public archive of this site is from 1997-10-09. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about foxfab.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
