Full analysis

Overview

The website is the public-service portal of France compétences, presenting information and services for French vocational-training regulation, apprenticeship financing, professional certification, institutional governance, mediation, and sector reporting rather than operating as a commercial platform.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or adverse reputation findings were observed. The institutional purpose shown on the homepage is consistent with a long-established domain and a substantial, continuous archival record; historical evidence does not indicate suspicious repurposing or semantic drift. The site's forms are limited to search and newsletter functions, with no sensitive, hidden, or externally directed form behavior detected.

- The domain registration record shows registration in 2018 (~8.42 years old), with creation dated 5 March 2018 and current expiration dated 16 January 2027.
- The web archive contains 505 snapshots spanning 8 February 2019–20 July 2026 (8 years tracked), with no suspicious repurposing identified.
- The homepage identifies the service as France compétences and consistently presents vocational-training, apprenticeship, certification, governance, mediation, and publication functions.
- Homepage behavior showed no login form, hidden form, credential-harvesting flow, cloaking, wallet interaction, clipboard hijacking, or suspicious inline scripts.

Regulatory Verification Notes

The homepage presents extensive institutional substance, including governance, strategy, executive delegations, annual accounts, activity reports, certification decisions, funding responsibilities, and regulatory documentation. It also connects visitors to French public-service resources operated through gouvernement.fr, [Legifrance](https://legifrance.gouv.fr), service-public.fr, and data.gouv.fr. No licensing claim or license number was observed, but the site presents itself as a national public authority rather than a broker or commercial financial-services provider; the unclear licensing-disclosure status therefore does not constitute evidence of deception. No corresponding broker entry was identified in the supplied third-party broker context, which is neutral and not a regulatory determination.

- The homepage provides dedicated institutional paths for the board of directors, thematic commissions, internal organization, executive leadership, delegated signatures, annual accounts, and activity reports.

- The professional-certification area offers certification searches, registration resources, documentation, assistance, and published registration decisions.
- The site is served from AS12601 (CEGEDIM – Cegedim.Cloud SASU, France).
- The site’s transport encryption uses a GandiCert-issued DV TLS certificate, valid until 25 October 2026.

What to Verify Next

For formal institutional due diligence, the entity’s mandate and any transaction-specific authority should be matched to the relevant French legal instrument or public registry. Material certification decisions should be cross-checked against the linked national repositories, while sensitive correspondence should use contact details independently obtained from an authoritative public-service source.

- The homepage links directly to Legifrance and other French government service domains that can support independent institutional verification.
- The site provides published certification decisions and access to national professional-certification search and registration functions.
- The institutional content includes annual accounts, activity reports, governance information, and delegated-signature materials suitable for documentary due diligence.

Summary Verdict

The website is assessed as a legitimate, established, and trustworthy public-service portal. Its institutional content, durable provenance, clean external reputation, coherent identity, and benign observed behavior converge strongly, with no contradictory risk signals identified.

Infrastructure Integrity

The site resolves directly to a France-based Cegedim.Cloud hosting address without a CDN or WAF layer; the resolved address appears to be the likely origin. This conventional, attributable hosting posture is consistent with the broader evidence, although infrastructure alone is not proof of institutional legitimacy.

Closing Assessment

Normal interaction, including standard site use and any legitimate account access offered through the service, is appropriate; formal decisions may rely on the portal subject to ordinary institutional due-diligence procedures.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about francecompetences.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
