Full analysis

Overview

FREE ASSUR is a French-language insurance brokerage and lead-generation website presenting quote requests for automobile, motorcycle, home, health, life and professional insurance, with the apparent business model of connecting prospective customers with insurance providers or intermediaries.

Scam/Impersonation Risk

No contradictions were observed: there is no detected phishing, brand-impersonation, blacklist, or malicious-content signal in the supplied evidence. The site's observed behavior was limited and benign, with no login form, hidden form, external posting activity, wallet interaction, cloaking, or suspicious script activity identified. Its provenance is consistent with an established web presence, although that history does not independently establish the real-world operator's identity.

EVIDENCE

- The homepage identifies “FREE ASSUR” and presents insurance quote services rather than imitating a separately identified brand.
- Behavioral testing recorded no external posts, no hidden forms, no password forms, no wallet activity, and no cloaking.
- The domain was registered through OVH on 2012-04-24T10:13:56Z and has an age of 14.33 years.
- Archive continuity is recorded across 14 years, from 2012-05-28T10:03:37Z to 2025-02-24T12:03:17Z.

Regulatory Verification Notes

The principal concern is verification of the business and its authority to arrange insurance, not evidence of active fraud. The homepage offers automobile, home, health, cyber, professional-liability and other insurance quotation services, but the available content does not visibly provide a sufficiently verifiable legal entity, address, registration information, or insurance intermediary authorization. Placeholder “Lorem ipsum” sections, testimonial placeholders, and a missing contact-form component further reduce the evidentiary quality of a site handling potentially sensitive insurance enquiries. The site therefore supports a moderate-trust assessment, while its operator identity and regulatory status remain unverified.

EVIDENCE

- The homepage lists multiple insurance categories and invites visitors to request quotations.
- The homepage contains placeholder Lorem Ipsum content and placeholder testimonials.
- The contact functionality shows no operational form in the captured page, and verifiable contact or address details were not evident.
- The domain is hosted by OVH - OVH SAS, FR on AS16276; its TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-29T14:11:37+00:00.

What to Verify Next

Before submitting personal, financial, or insurance-related information, the prospective customer should confirm the legal entity named in any quotation or policy documentation through the relevant official business and insurance-intermediary registers. Contact details should be validated through an independently sourced channel, and any quotation should identify the actual insurer, intermediary, commission relationship, policy terms, and applicable complaints process.

EVIDENCE

- The homepage presents quotation calls to action for several high-stakes insurance categories.
- The captured page does not show a clear legal-entity or authorization disclosure.
- The site’s missing contact-form component limits direct validation of the operating contact channel.

Summary Verdict

The website presents a **moderate-trust posture**: available evidence is consistent with an established, apparently legitimate insurance lead-generation operation, and no active threat or impersonation contradiction

was identified. Confidence is constrained because the real-world operator and governance arrangements are not independently verified.

Infrastructure Integrity

The site benefits from CDN/WAF protection, and the observed infrastructure exposed only an edge address rather than an origin candidate. This reduces direct origin exposure and is a mitigating technical control, but it does not establish the legitimacy of the business operating the site.

Closing Assessment

Ordinary browsing is reasonable, while sensitive submissions or consequential financial commitments should proceed only after independent confirmation of the counterparty and the specific terms being offered.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about freeassur.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
