

# Is frontentrydoor.ca a scam? TrustSniffer's high-risk assessment: 0/100

frontentrydoor.ca

## Verdict

0

OUT OF 100

CRITICAL RISK

frontentrydoor.ca shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Front Entry Doors Toronto — a manufacturer and installer of fiberglass exterior entry doors, providing product information, gallery, contact phone and email, and service area list. Contains company address and call-to-action for estimates.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

<https://frontentrydoor.ca/>

What frontentrydoor.ca served when TrustSniffer captured it on 2026-08-21. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Front Entry Doors Toronto is a local commercial website presenting fiberglass exterior entry doors, windows, product galleries, installation services, guarantees, service-area information, and requests for in-home estimates. Its apparent business model is direct-to-consumer manufacture and installation of residential entry products in Toronto and surrounding areas.

### Scam/Impersonation Risk

The site's content presents a coherent local-business proposition and does not show a login form, credential-collection flow, wallet connection, or other obvious phishing mechanism. However, this benign presentation is outweighed by **confirmed external reputation contradictions**: multiple external detections classify the domain or associated infrastructure as malicious or suspicious, and blacklist records are present. Abuse reports are attributed to the shared content-delivery infrastructure rather than conclusively to the website operator, but the attribution does not remove the need for a security-forward posture. No site-level brand impersonation or

phishing indicator was identified, so the evidence supports a critical sensitive-interaction risk without establishing that the business presentation itself is fraudulent.

#### EVIDENCE

- The homepage describes a manufacturer and installer of fiberglass front-entry doors, with product information, galleries, guarantees, and estimate requests; no login or sensitive-data form was observed.
- External reputation results recorded 8 malicious detections and 1 suspicious detection, with a Tier-1 threat detection and confirmed blacklist status.
- The associated IP address received 16 abuse reports; the reports were attributed to shared Amazon content-delivery infrastructure rather than uniquely to the website.
- Domain registration records show creation on 2016-11-22, with an age of approximately 9.75 years.

### Regulatory Verification Notes

The About, Guarantee, and Contact content supplies a business description, telephone contact, address, and service-area claims, but the available material does not independently verify the legal operator. No licensing claim, registration number, or regulatory authority is identified; for a residential door manufacturer and installer, this is a disclosure and verification matter rather than standalone evidence of a scam. The site's commercial presentation is therefore insufficient to overcome the external security findings, and any contractual, payment, warranty, or installation engagement should depend on confirming the responsible legal entity and applicable local requirements.

#### EVIDENCE

- The About and homepage content claims more than 20 years of production experience and direct manufacture of custom fiberglass exterior doors.
- The Contact and estimate pathways provide a telephone contact, business address, and service-area information, but no independently verified legal-entity record is supplied.
- The site's transport encryption uses a DV certificate issued by YE1, valid through 2026-11-07.
- The site is served through AS16509, identified as AMAZON-02 - Amazon.com, Inc., US.

### What to Verify Next

Before any non-reversible engagement, an independent check should confirm the operating entity, physical business presence, installation authorization, warranty issuer, and any municipal or provincial requirements applicable to the proposed work. Payment should use a method with meaningful dispute and consumer-protection mechanisms, and contact details should be validated through an independent route rather than relying solely on the website. Credentials or financial information should not be submitted through the site unless the external detections have been resolved and the transaction path has been separately validated.

## EVIDENCE

- The website's primary conversion path is an in-home estimate or callback request rather than an observed online checkout or account-login workflow.
- Behavioral testing recorded no external XHR or fetch activity, no hidden forms, no wallet-provider activity, and no password-external-form submission.
- Historical records contain 29 archive snapshots spanning 2015–2026, covering 12 tracked years.

## Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Although the site has a plausible local-service presentation and technically stable web behavior, the confirmed external security contradictions prevent the available evidence from supporting normal trust in credential, payment, or other sensitive use.

## Infrastructure Integrity

CDN/WAF protection provides some mitigation against direct exposure of the underlying service and can reduce ordinary hosting attack surface, but it is not evidence of operator legitimacy. The observed infrastructure consists of a single CDN edge path, with the origin not observable in this analysis.

## Closing Assessment

Restrict activity to passive review until the external detections are explained and the business, contractual, and payment arrangements are independently validated; sensitive information and financial commitments should remain off the site in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

### 01 Governance Risk

- The public registration record for this domain is incomplete.  
Registration and ownership rule:KF\_WHOIS\_INCOMPLETE
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.  
Registration and ownership rule:KF\_WHOIS\_PRIVATE
- The registration record withholds contact details for the operator.  
Registration and ownership rule:KF\_WHOIS\_HIDDEN

### 02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.  
External reputation rule:EXT\_BLACKLIST\_CRITICAL

Signals weighed against the site

- AbuseIPDB: 16 reports on hosting IP 75.2.60.5 (Amazon.com, Inc., Content Delivery Network), 19% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of frontentrydoor.ca.

- The request stayed on frontentrydoor.ca. It was not redirected to another domain. CLEAR
- Registration is published under Domain.com, LLC. CLEAR
- DNS for this domain is served by netfirms.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-22. NOTED
- The earliest public archive of this site is from 2015-01-10. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

## About this assessment

---

A trust score summarises the evidence TrustSniffer could collect about frontentrydoor.ca at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
