

Is fspestcontrol.com safe? TrustSniffer's low-trust assessment: 39/100

fspestcontrol.com

Verdict

39

OUT OF 100

LOW TRUST

fspestcontrol.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Small, Spanish-language local pest control business page listing services, phone and email contact, and a satisfaction guarantee. No sign-up, payments, or investment solicitations.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://fspestcontrol.com/>

What fspestcontrol.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Spanish-language local pest-control business page for Father and Son Pest Control, presenting residential, commercial, and industrial extermination services across the island, a free-estimate contact route, and a guarantee covering its services.

Scam/Impersonation Risk

The website's own content presents a conventional local-service model rather than a phishing, investment, payment, or credential-harvesting operation. The homepage contains no login form, sensitive submission form, wallet connection, or external payment flow, and no on-page brand-impersonation indicator was identified. However, this benign presentation is materially outweighed by external threat intelligence showing malicious detections and a confirmed blacklist status from two sources. The site therefore carries a significant risk for sensitive interaction despite the absence of an apparent abuse mechanism on the page. Positive counter-signals include a long-established registration record and a consistent local-service presentation, but they do not resolve the external reputation contradiction.

EVIDENCE

- Homepage: Spanish-language service description for cockroaches, ants, mice, fleas, ticks, and termites, with a stated service guarantee and no login or payment form.
- External reputation: 2 malicious detections and 2 suspicious detections were recorded; the domain is confirmed on 2 external blacklist sources.
- Domain registration: Registered 2013-06-24, approximately 13.16 years old, with registration continuity to 2027-06-24.
- Historical record: First seen 2014-02-09 and last seen 2025-07-11, with 12 years tracked.

Regulatory Verification Notes

The available homepage supports an apparent pest-control service business, but the real-world operator identity is not independently verified. The site does not present a licensing authority or license number, leaving the authorization status of the service provider unclear; this is a regulatory-transparency gap rather than, by itself, evidence of a scam. The domain uses a mainstream registrar, and its transport security and hosting are technically established, although those controls do not validate the operator or its regulatory standing.

EVIDENCE

- Homepage: Identifies “Father and Son Pest Control,” describes service coverage for residences, businesses, and industries, and does not state a licensing authority or license number.
- Registration record: Registrar identified as GoDaddy.com, LLC; creation date 2013-06-24 and expiration date 2027-06-24.
- Hosting infrastructure: Served from AS54641, operated by IMH-IAD - InMotion Hosting, Inc., US.
- Transport encryption: TLS certificate issued by YR2 using DV validation, valid to 2026-10-18.

What to Verify Next

Before any appointment, contract, or payment, the business name and contact details should be confirmed through an independent offline route and matched against applicable local business and pest-control authorization records. The stated service guarantee should be obtained in written form, including exclusions, refund terms, treatment scope, and the legal entity responsible for performance. Any estimate should identify the contracting party, service address, payment recipient, and complaint or remediation process before funds are transferred.

EVIDENCE

- Homepage: Offers a free estimate and states that all services are guaranteed; written terms should be requested before engagement.
- Homepage: States that services cover residential, commercial, and industrial customers across the island; the claimed operating area can be checked against independent business records.
- Homepage: Provides direct contact details for booking estimates; those channels should be independently corroborated before sensitive information is shared.

Summary Verdict

The overall posture is **low trust**, with a high-consequence concern for sensitive interaction. The site's straightforward business presentation and established technical footprint are insufficient to offset the confirmed external reputation contradiction, while operator identity and authorization remain unresolved.

Infrastructure Integrity

The website is protected by a CDN/WAF, with observed edge IPs 13.248.169.48 and 76.223.54.146 on AS16509, alongside a potential origin candidate. This architecture provides a mitigating layer against direct exposure, but CDN/WAF protection is not evidence of business legitimacy.

Closing Assessment

The appropriate posture is read-only review until independent identity, authorization, and service-contract checks are completed; credentials and payment details should not be submitted through or in response to this site without those checks.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fspestcontrol.com.

- The request stayed on fspstcontrol.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by servconfig.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-24. NOTED
- The earliest public archive of this site is from 2014-02-09. CLEAR
- It is hosted on IMH-IAD, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fspstcontrol.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
