Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

FULLBlog is an established Spanish-language blogging and social-publishing portal that lets visitors create free blogs, publish posts, images, and videos, comment on community content, and participate in regional and interest-based communities.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or malicious reputation findings were observed. The homepage uses a conventional account-login form without sensitive-form behavior, hidden forms, wallet activity, clipboard manipulation, cloaking, or suspicious scripts. Public posts and community features are consistent with the stated publishing model, supporting the conclusion that normal interaction is appropriate.

- Homepage: presents public blogging, commenting, image, and video functionality with no deception indicators.
- Login behavior: one standard login form; no sensitive destination, hidden form, wallet activity, or credential-harvesting behavior observed.
- External reputation: zero malicious and zero suspicious detections; the domain is listed within the global top one million traffic sites.

Regulatory Verification Notes

The site presents a free publishing service rather than a financial product or transaction platform. No licensing claim or registration number is evidenced in the supplied content; this is a limited disclosure point for institutional onboarding, not evidence of fraud or an identity contradiction. No adverse broker-reputation match was identified.

- Homepage: describes a free blogging and community service with no evident financial transaction.
- Domain registration: registered in 2013 and approximately 12.94 years old; registrar: nicar.
- Hosting: served from AS13335, Cloudflare, Inc.
- TLS: certificate issued by WE1, using DV validation, valid through 2026-10-09.

What to Verify Next

For formal business onboarding, confirm the applicable service terms, operating entity, and official support channels through independently sourced records. Standard account login and ordinary platform use are appropriate based on the current evidence.

- Homepage: identifies the service as “FULLBlog” and explains its free publishing model.
- Registration record: lists GALLO GERARDO PABLO as the registrant.
- Transport security: valid WE1-issued TLS certificate protects the site connection.

Summary Verdict

FULLBlog reads as a legitimate, established, trustworthy community-publishing service. The evidence converges on a low-risk SaaS profile with no observed scam, impersonation, phishing, or malicious-reputation indicators.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating on Cloudflare edge addresses rather than a directly exposed origin. This provides a meaningful protective layer, although it is a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Normal browsing, account login, content publication, and standard platform actions may proceed under ordinary organizational security controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fullblog.com.ar.

- The request stayed on fullblog.com.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-18. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fullblog.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
