Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

FULLTV is a Spanish-language television and streaming guide presenting channel listings, programming information, movie and series catalogs, and entertainment resources through an advertising-supported informational service rather than a paid financial-return model.

Scam/Impersonation Risk

No contradictions were observed across the site identity, page content, historical continuity, and external reputation signals. The homepage presents a coherent informational purpose, explicitly distinguishes information from retransmission of television signals, and shows no credential-harvesting, phishing, brand-impersonation, or financial-manipulation indicators. Normal interaction, including account login where applicable, is appropriate.

- Homepage content identifies FULLTV as a television, cinema, series, and streaming information guide with no sensitive form detected.
- The homepage states that the service provides information rather than retransmitting television signals.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- Domain registration: 2013-08-26 (~13 years old).

Regulatory Verification Notes

The site's apparent advertising-supported informational model does not present a financial service or a licensing-based investment offering. Its homepage references advertising, privacy, terms, and DMCA contact provisions, supporting a basic operating and content-governance framework; no regulated financial-license claim is made. The available third-party broker context contains no matching record and should be treated only as contextual reputation information.

- Archive history contains 622 snapshots spanning 2008–2026, covering 19 tracked years.
- The site is served from AS13335, Cloudflare, Inc., United States.
- TLS uses issuer WE1 with DV validation and is valid through 2026-09-17.
- The homepage title is "TV en VIVO - Guía de TV Gratis - FULLTV Online."

What to Verify Next

For operational assurance, confirm that current channel listings and program information remain accurate, review the site's terms and privacy provisions before relying on its content, and independently confirm official contact channels when support is required.

- The homepage provides channel, movie, series, news, music, sports, science, and children's programming information.
- The homepage references privacy, terms, advertising, and DMCA contact materials.
- No paid transaction or financial-return mechanism was identified in the reviewed content.

Summary Verdict

FULLTV presents as a legitimate, established, trustworthy informational website with a coherent purpose and no observed scam or impersonation contradictions. Its overall posture supports ordinary browsing and standard interaction.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were Cloudflare edge servers rather than exposed origin candidates. This provides a meaningful mitigating control for direct origin exposure, although protective hosting infrastructure is not by itself proof of legitimacy.

Closing Assessment

Standard use is appropriate, subject to ordinary review of content accuracy and site terms.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of fulltv.com.ar.

- The request stayed on fulltv.com.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about fulltv.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
